Hardy Herbaceous Alpine Plants

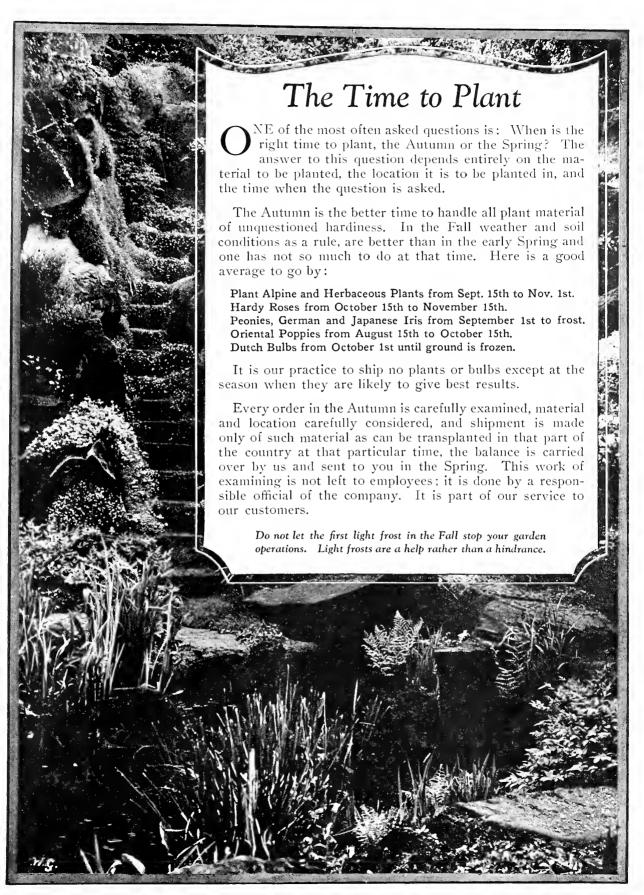

Wholesale Catalog Autumn, 1927

The WAYSIDE GARDENS CO. Mentor, Ohio

America's Greatest Producers of Hardy Perennials

The WAYSIDE (MEDICO) Obio
Montros Granist Production
of Handy Perspirals

Type of New Giant Japanese Iris.

DURING the past years a great deal of attention has been given to the improving of German Iris. During these same years we devoted our special attention to the much harder and slower process of improving the Japanese Iris. Of the thousands of seedlings that we have raised only a few of the very best are now offered for sale for the first time. On page 27 we list a wonderful collection of these beautiful Irises. Varieties such as Albatross, America, Columbia, La Tosca, Lavender Giant, Matchless and Olympia, are most exquisite. There are also other varieties listed on that page which are unusually fine. Conservative as we are we do not hesitate to say that our collection is the finest and most worth while in America today.

General List of Herbaceous and Alpine Plants

ACHILLEA (Milfoil or Yarrow).

Plants suitable for dry, sunny places. Tuseful for carpeting or for rockeries; the border plants.	talle	varf kir er varie Doz.	ties as
Eupatorium (syn. filipendulina). 3 to 4 feet. Flat heads of brilliant yellow flowers; finely cut foliage. Blooms all Summer	0.65	\$1.75	\$12.50
Millefolium roseum (Rosy Milfoil). July to October. Rosy pink flowers in dense heads, on stems 18 inches high. Effect- ive on edge of shrubbery or in border			
Perry's White. 1 to 2 feet. June to September. A choice new variety; pure white flowers over one inch across; broad, overlapping petals. Nothing better for cutting	.55	1.35	9.00
Ptarmica, The Pearl. Pure white, double flowers all Summer. Prized for cutting.	.55	1.35	9.00
Ptarmica, Boule de Neige. New. An improvement on "The Pearl," with fuller and more perfect flowers. Best for		. 05	
borders Sibirica. Fine rock or wall plant. Produces long, graceful, silvery leaves,	.55	1.35	
effective throughout the entire Summer. Tomentosa. 6 to 8 inches. July to September. Bright yellow flowers. Excel-	.85	2.50	18.00
lent for rockeries	.65	1.75	12.50

ACONITUM (Monkshood).

Summer- and late Autumn-flowering plants with bold spikes of hood-shaped flowers, thriving in either sun or shade. The roots are poisonous and should not be planted where the tubers might be mistaken for vegetables. Delivery from October 15th to

be mistaken for vegetables. Delivery from O March 15th. Tubers cannot freeze.	ctober	15th to
Three	Doz.	100
Fischeri. A dwarf variety with pale blue flowers. 18 inches. September\$0.65	\$1.75	\$12.50
Napellus (The Monkshood). 3 to 4 feet. July to August, Large dark blue flowin a raceme	4.75	35.00
Napellus carneum. 2 to 2½ feet. July-August. This variety has variegated red and white flowers; effective 1.60	4.75	35.00
Napellus, Newry Blue. Similar to Napellus, but somewhat darker in color 1.60	4.75	35.00
Sparks' Variety. July- and August-flower- ing; tall branched spikes covered with deep blue, Monkshood flowers 1.20	3.50	25.00
Wilsoni. The true variety which we are herewith offering is the late Autumn flowering kind, producing 6 to 7 foot tall spikes covered with beautiful mauve colored flowers. It is a very rare variety. We advise giving it a little protection during the Winter	6.00	50.00
ACORUS (Sweet Flag).		
Calamus. 2 feet. June-July. Leaves sword shape, erect; flowers inconspicu- ous. Root stock pungent, aromatic.		

Onicinus. I feet. June-July. Heaves			
sword shape, erect; flowers inconspicu-			
ous. Root stock pungent, aromatic.			
Thrives best in moist soil, and may be			
grown in shallow water or dry land	55	1.50	10.00

ACTAEA (Baneberry).

flowers. Good for cutting; effective as a border plant and in shady woodland	9		
plantings		2.25	17.50
Rubra. Red form of the above	1.00	3.00	20.00

AETHIONEMA (Persian Candytuft).

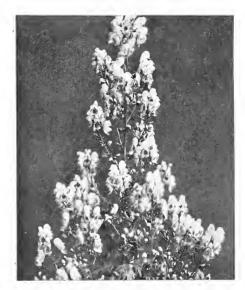

Alba. 2½ feet. A very much improved

Near relatives of the Candytuft, these hardy little rock plants are of the most fascinating character. The foliage of most of them is a beautiful, glaucous blue; stems woody, and when covered with their heads of pink blossoms, make a picture not to be forgotten. We supply pot plants only, as field plants are hard to establish.

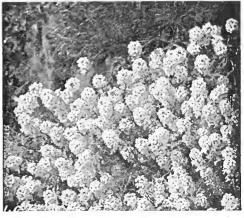

They are almost shrubby in habit, and are improved by a slight cutting back after blooming. Stony, sandy loam is suitable for them and a warm, sunny position. Given these conditions, they will grow more beautiful every year.

	Three	Doz.	100
Grandiflorum. Strong, twiggy bushes,			
ered with long, slender spikes of			
pink flowers. One of our best plants. 9 inches		\$3.25	\$22.50
Persicum. Somewhat deeper in color Grandiflorum		3.25	22.50

Aconitum Fischeri.

Aethionema Persicum.

Anchusa Italica. Is fine for border plant.

Alyssum Saxatile. Excellent for edging.

Arabis Alpina.

ANEMONE - Windflower

ANEMONE JAPONICA (Japanese Anemone).

Valuable plants suitable for massing or single specimens. They grow rapidly and are profuse in bloom, gaining strength and beauty each year. The blooming period extends from August till mid-November, the large, open flowers furnishing abundant cut flowers and a brilliant field display. Cover plants in Winter. We offer strong, field-grown roots only.

	ANEMONE SPECIES				
	Tupehensis (Early Anemone). Was originally introduced from central China, is closely allied to Anemone japonica, which, in a miniature form, it resembles. The plant grows from 10 to 12 inches high and from early in August until late in Autumn produces an abundance of flowers about 1½ inches in diameter, of a pleasing mauve-rose	.65	1,75	12.00	
	Eupehensis flore pleno. Double form of the above	1.00	3.00	20,00	
	Pulsatila (Pasque Flower). Grows from 9 to 12 inches high and produces violet or purple flowers during April and May. An interesting plant for the rockery or well drained border	.75	2.00	15.00	
	white flowers. Buds are tinged with red. 9 inches high. June flowering	1.20	3,50	25.00	
	Pulsatilla rubra. Of dwarf habit with reddish purple flowers	.75	2.00	15.00	
	Sylvestris. Fine for cool, moist corner of rock garden or border. Large, white blossoms on nodding stems of about 12 inches. Very free blooming. May and June	.85	2.50	18.00	
	and exquisite alpine. Large, open flowers of pure white, flushed violet outside. Blooms very early. Easily grown in rich vegetable soil in full sun. Very choice (Sold out for this season).				
A	NTHERICUM (Paradisea). Liliastrum major (St. Bruno's Lily). Flowers white, with narrow, grasslike foliage. 1½ feet. May-June	1.40	4.00	30.00	
A	RENARIA (Sandwort). Montana. A hardy perennial growing in close tufts, profusely covered with small, silvery white flowers which appear quite early in the season. Excellent as an edging plant in formal gardens. Suitable for rockeries in sunny places. Flowers resemble small, white,				
	upturned morning glories	.75	2.00	15.00	
	SCLEPIAS (Butterfly Weed). Tuberosa. Attractive native plants, flowering during July and August, and growing about 2½ feet high. Umbels of bright orange colored flowers	.55	1.50	10.00	
	of bright orange colored howers	.00	1.00	¥ 0.00	

Anemone Japonica, Whirlwind.

Anemone Pulsatilla.

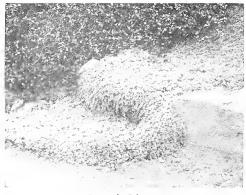

Asclepias Tuberosa.

Aquilegia.

Armeria, Maritima Hybrids.

Asperula Odorata.

AQUILEGIA - Columbine

As a cut flower the Long-Spurred Aquilegias are the daintiest of our outdoor grown flowers. They come in blues, whites and yellows, and shades of pink and rose in strains reasonably true, Practically all the various shades and colors are in the Coerulea Hybrids. They remain in bloom for a long season and are vigorous and long lived. They are not at all particular as to soil or location, although they prefer a sandy loam and a moist but well drained, sunny position, and usually make themselves at home in any hardy border or rockery. Their period of flowering covers the late Spring and early Summer months. Taken as a whole, they are a most important part of the hardy garden, and should be grown in quantity by every lover of old-

New Imported Hardy Asters

We are offering on this page a collection of New Hardy Asters. The newest varieties are indicated thus (*), and were selected by Mr. Grullemans, while in Europe, from more than a hundred recent introductions. We have priced them reasonably, and suggest their use in place of the older and less attractive varieties which are commonly listed.

HARDY ASTERS (Michaelmas Daisies)

The many species, widely distinct from each other in habit and form, are with a few exceptions, all native of North America. It is in Europe, however, that our Asters have been most highly appreciated. Many improvements have been made by European growers, and many hybrid forms have been produced by crossing the different species. For the best results, they require division and replanting every third year.

*Blue Gem. Double flowers of rich blue	hree 0.85	Doz. \$2.50	$\substack{100\\\$15.00}$
*Charm. Very double violet-blue flowers	.65	1.75	12.00
Climax. One of the best and showiest, with large, pyramidal spikes of large, light lavender-blue flowers; very free 5 feet	.65	1.75	12.06
*Erica. A beautiful clear pink; large double flowers	.65	1.75	12.00
*Elta (New). Double flowers of pale lilac. Very handsome shade	.65	1.75	12.00
Feltham Blue. A pretty aniline blue; very free	.65	1.75	12.00
Glory of Colwall. Good sized, almost double; ageratum-blue flowers	.55	1.50	10.00
*Grey Lady. Exquisite shade of opal, with large, semi-double flowers. Extra fine	.65	1.75	12.00
*Joan Vaughan. Large, semi-double flowers of deepest blue	.65	1.75	12.00
*Lady Lloyd. A very fine, clear rose- pink. Lasts exceedingly well. 3 feet	.65	1.75	12.00
*Mauve Queen. Very large, semi-double flowers of clear mauve. 4 feet	.65	1.75	12.00
*Maid of Colwall. Pure white; the finest of all whites. Long, loose spikes of huge flowers	.75	2.00	15.00
Maggie Perry. Very large flowers, frequently 2½ inches across, loosely arranged in large trusses, of a pleasing tone of soft mauve. Most distinct and striking novelty	.65	1.75	12.00
Mrs. Raynor. The deepest red of all Asters	.75	2.00	15.00
*Nancy Ballard. Deep purplish mauve flowers, semi-double in form; flower heads are branched, completely covered with masses of bloom	.75	2.00	15.00
Novae-angliae roseum superbum. This is a new introduction of our own, and is by far the best Aster we have ever seen. Color almost red and a profuse bloomer.	.65	1.75	12.00
*Perry's White. The finest white Michaelmas Daisy yet introduced: perfect in habit and remarkably free flowering. The stout stems are well branched and covered with flowers 2½ inches across.	.65	1.75	12.00
*Peggy Ballard. Large, pyramidal sprays of double, rosy mauve flowers. 3 feet	.75	2.00	15.00
*Queen of Colwall (New). One of the finest of late introductions; large, stout branching stems, covered with pale mauve blooms. Tall	.65	1.75	12.00

Hardy Garden Chrysanthemums

The following varieties are perfectly hardy if grown in a place not too wet. After through flowering cut the dead stalks down to within two or three inches of the ground and cover with dry leaves. In the Spring, after they start to grow, divide so one shoot will remain for the future plant.

CHOICE NAMED VARIETIES

The varieties offered below comprise the choicest new hardy outdoor sorts. We have chosen the earliest to bloom, so that the full enjoyment of these best-of-all Autumn flowers may be derived by those in northern territories where Winter comes early.

early. 234-inch pots will be supplied in the Spring from March 1st until July 1st. In Autumn we supply field grown clumps.

EARLY-FLOWERING VARIETIES

CERYSANTHEMUMS-Continued.

HARDY OLD-FASHIONED VARIETIES

We collected from old gardens some of the old-fashioned Chrysanthemums which are really hardy and which bloom in October and November, after all other outdoor flowers are gone. Often in bloom when the snow is on the ground; are very showy. S to 4 feet high. When in bloom are a perfect mass of flowers.

Old-fashioned Hardy Pink	Three\$0.65	Doz . \$1.75	$100 \\ 12.00
Old-fashioned Hardy Red	55	1.50	10.00
Old-fashioned Hardy White	,55	1.50	10.00
Old-fashioned Hardy Yellow	65	1.75	12.00

(The above varieties are supplied in strong, field-grown plants).

We do not advise the planting of Hardy Garden Chrysanthemums in the Autumn in any locality where the temperature, during the Winter, goes ten degrees below the freezing point. In southern or other states where this does not happen, we suggest the use of field-grown clumps. Field plants should also be obtained in the late Autumn for propagating during the Winter.

CHRYSANTHEMUM MAXIMUM (Shasta Daisy).

The improved varieties of Marguerite, all aliied to the Shasta Daisy that adorns our fields in the Spring, are among the most useful of our garden flowers. Not only have these flowers been greatly improved in size and form, but there are now early and late blooming varieties which give a succession of long-stemmed flowers so valuable for vase decoration during four months of the year. Glory of Wayside is a variety worthy of attention, and Etolie d'Or is robust and free flowering. Mrs. C. Lowthian Beil has enormous flowers with strong stems. The Shasta Daisy has a yellow center with long, white petals, the slender stems springing from the base of the plant, and is most attractive either in the perennial border or as a cut flower. Common kinds like Alaska have been discontinued.

DELPHINIUM - Larkspur

English Delphiniums are the most beautiful hardy plants in cultivation, for they have such an immense variety of beauty and increase in size, in beauty, and often in quantity, year after year. Some varieties grow 8 feet high in rich soil. They have immense spikes of most beautiful flowers of every imaginable shade of blue, and their season is long; in fact, they will bloom from Spring till Fall.

The culture of Delphiniums is exceedingly simple. They thrive in almost any position, and may be planted at any time of the year, provided that in Summer the plants are not too forward, and that they be well watered if the weather is dry. The soil may be a rich, friable loam, which suits them finely; but any soil, even hot and sandy, if well watered and manured, will give excellent results. Placed in lines, as a background to a border, or in groups of, say, three plants at intervals, the effect of the Delphinium is exceedingly fine. A succession of flowers may be expected from Spring to early Autumn, especially if the spikes which have done flowering early, be cut down to the ground, fresh growth will then be produced which have will then be produced which will give blossoms. Watering in Summer will increase size of spike and flower. Top-dressing is greatly recommended on certain soils, instead of the bare surface of the ground being left exposed to the sun. Some of the neater dwarf Alpine and other hardy plants may be utilized to plant between and around Delphiniums. Coal ashes strewn over the crowns will protect the plants from slugs through the Winter and Spring. Any garden soil suits the Delphiniums.

Choicest Wayside Gardens Unnamed Hybrids

Here offered are the newest, the best and the finest to be secured anywhere. The range of colors varies from the palest shade of blue to the deepest indigo blue and royal purple with many intermediary pastel tones of mauve,

pink and lavender blendings. Among these new hybrids are flowers of huge size in both single and double forms. This strain has been raised from seed saved from the finest named kinds in creation. Visitors at our nursery proclaim them the best they have ever seen. Those who wish to perfect their already much prized borders cannot afford to overlook these wonderful hy-

May be forced to bloom in the house by anyone without any trouble.

Shirley Hybrid Digitalis.

Dianthus, Deltoides.

DIELYTRA OR DICENTRA (Bleeding Heart).

A hardy perennial with heart-shaped, rose colored flowers in drooping spikes. The base of the flower is furnished with two sheathlike spurs. One of the best border plants; perfectly hardy and easily cultivated. Flowers in April or May. The Bleeding Heart is one of the choicest members of the old-fashioned gardens. They prefer the shaded nooks in the border.

Three Doz. 100

Eximia (Plumy Bleeding Heart). A dwarf-growing sort, with beautiful finely cut foliage and showy racemes of pretty pink flowers throughout the season. Too much cannot be said for this fine border plant as it is equally at home in full shade or sun and perfectly hardy anywhere. Will grow in any climate under any conditions.	202.

One of our finest wild Ferns. Give it moisture
and shade.

As iovers of plants and flowers we ask you not to plant Ferns unless you give them the requirements they need and have the proper place to grow them.

Funkia Variegata.

FERNS - Hardy Varieties

The cultivation of Hardy Ferns is remarkably simple. All they want is a light alluvial soil, a little loam and peat or leaf-mould sufficient to keep the soil light and open, plenty of moisture, position varying from partial to deep shade. The aspleniums and many others will grow on walls, chinks of rocks, etc. Many will revel in full sunshine in any ordinary border. There is scarcely a garden or even a back yard where Ferns cannot be grown successfully. Anyone commencing with a few specimens will soon be induced to go on collecting until he has made a feature both interesting to himself, and also to all who see them.

GAILLARDIA - Blanket Flower

Improved English Strain. We consider the Gaillardia one of the most desirable hardy plants in cultivation, and our strain of these brilliant flowered plants to be the finest extant. Though such an ornamental addition to the herbaceous border, the perennial Gailiardia is content with extremely simple treatment. Dig the soil deeply and enrich with weil-rotted manure. We recommend the Gaillardia for bedding purposes as well as for borders. Everyone will have noticed how grandly Gaillardias have thriven through droughts; they seem hardly to need water. The gay blossoms are obtainable in perpetual profusion from June to November and the greater the drought and scarcity of other flowers the more the utility of the perennial Gaillardia is demonstrated. No more beautiful and brilliant sight can be imagined than a large bed of Gaillardias, with their profusion of highly colored flowers of all shades. Some of the varieties of our improved strain measure fully 5 inches in diameter.

Gailiardia-English Hybrids.

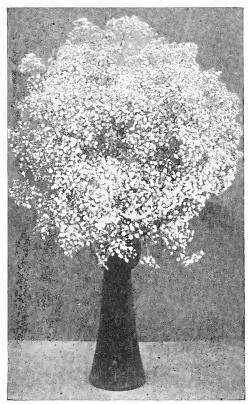

Geum, Lady Stratheden.

Hardy Geranium (var. Ibericum).

Eulalia Zebrina.

Gypsophila Paniculata.

Gypsophila Repens.

GRASSES (Hardy Ornamental).

The ornamental Grasses can be used with telling effect in borders, large beds, or by the margin of ponds and lakes. They are often used with small shrubs and medium sized trees in wide borders. The Eulalias planted singly on lawns where the soil is deep and rich, take care of themselves and grow very rapidly into large specimens. In large, round beds, with ornamental Grasses as the principal feature, the effect is heightened by the addition of such plants as Cannas or dwarf-flower-ering plants near the margin.

	Three	Doz.	100

Eiverton Beauty. Pure lemon-yellow, with large disc of purplish black	1.75	12.00
Riverton Gem (New). Old gold, suffused with bright terra cotta, changing to wallflower-red. August to October75	2.00	15.00

HELIANTHUS (Hardy Sunflower).

The perennial Sunflower should always be planted in masses, where they may have plenty of room, against backgrounds of shrubbery, or naturalized in wild gardens or woodlands. They produce a grand effect impossible to describe. In combination with hardy Asters, where broad color effects are wanted in its Summer, they have few equals. They are profuse blockers, producing an unlimited supply of flowers for decoration.

Three	Doz.	100
Maximiliani. The latest of all. Golden yellow flowers in graceful sprays in October. Fine for cutting, 6 feet\$0.55	\$1.50	\$10.00
Mollis. An improved variety of Heiianthus iactiflorus; of tailer growth and having larger flowers. A decided improvement and most beautifui sort	1.50	10.00
Multiflorus fl. pl. Ciear yeijow; closely resembling a Dahlia in shape and finish. 4 feet	2.00	15.00
Sparcifolius. The best of the Summer- blooming varieties of hardy Sunflowers. Flowers 3 inches in diameter and freely produced. Plant grows 3 to 4 feet high, and spreads rapidly. Fine for the bor- der, and for planting among shrubs	1.50	10.00

HELIANTHEMUM (Rock or Sun Rose).

Low-growing evergreen plants, forming broad clumps, and which during their flowering season, July to September, are hidden by a mass of bloom; for the front of the border, the rockery, or a dry, sunny bank.

rockery, or a dry, sunny bank.	Three	Doz.	100

Choice Mixed Varieties	.55	1.50	10.00

Hehanthemums belong to the finest border or rock plants, but fleid grown plants should be trimmed back before planting, as they are otherwise hard to establish. We offer also 3-inch pot plants ready to bicom, which establish easily and do not have to be cut back, at the additional charge of 5 cents per plant. Specify pot plants when ordering.

Helenium Autumnale Rubrum.

Helianthemum Growing in Rock Garden.

Helianthus Multiflorus fl. pl.

Hemerocallis-Day Lily.

HOLLYHOCKS - Althea Rosea

The Hollyhock is an old garden favorite, full of sentiment and association with a distant past. It is a plant of strong, vigorous growth and noble aspect, with elegant camellia-like flowers that form perfect rosettes of the most lovely shades of color. They require a deep, rich soil and a sunny corner, but will repay by their gorgeous and lavish bloom all the attention bestowed upon them. Painters choose Hollyhocks as subjects for floral paintings oftener than any other flower. We suppose the reason for this is that artists have a keener appreciation of beauty than other people, and recognize that the common single Hollyhock is one of the most stately, picturesque and beautiful plants in the world. Nothing can be more effective than a large group of single Hollyhocks, and once planted they will literally take care of themselves even if planted in the grass. We know of patches that have not been cultivated or disturbed in any way for twenty years. Some people think double Hollyhocks are more beautiful than single. They are mistaken, although the doubles are beautiful, but inclined to be topheavy. Hollyhocks planted in the Fall will bloom the following Summer.

	Three	Doz.	100
DOUBLE. Separate colors, as follows:			
Bright Rose	.\$0.50	\$1.25	\$ 8.00
Maroon	50	1.25	8.00

SINGLE. Mixed	50	1.25	8.00

(Our Hollyhocks are free from disease and rust. Clean, strong, one-year-old stock; two-year-old plants are never sent out, as they are not satisfactory).

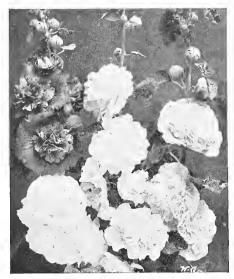

HIBISCUS (Mallow).

Mallow Marvels. A robust type of upright habit, producing an abundance of flowers of enormous size in all the richest shades of crimson, pink and white.

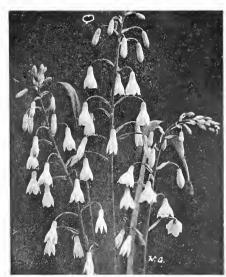

shades of crimson, pink and white.

New Giant-Flowering Marshmallow. A wonderfully improved form of our greatly admired native Marshmallow or Rosemallow, in which not only the colors have been greatly intensified, but in which flowers of enormous size, frequently 10 to 12 inches in diameter, have been developed. Equally at home in all positions, having the same vigor in dry and wet ground; perfectly hardy and are very floriferous, blooming from early in July until late in September. They are the most beautiful and hardy of all herbaceous plants; their dignified spikes of huge blossoms make them indispensable for large groups and mixed borders.

Red, Pink or White and Crimson Eye. Strong, 3-year-old\$0.65	\$1.75	\$12.00
Red, Pink or White and Crimson Eye. Strong, 2-year-old	1.50	10.00

IRIS KAEMPFERI - Japanese Iris

The magnificent Iris Kaempferi belong to the Apogons, and a field of them in bloom is a most gorgeous sight. Seeing them for the first time, one cannot withhold an exclamation of surprise, and having once seen can never forget their striking beauty.

Time to Plant. Latter part of August to the beginning of October is the best time. Late plantings should be protected by a light covering of straw or leaves after the ground is permanently frozen, to prevent roots from being heaved out of ground by frost. In northern sections late planting had best be deferred until Spring, during April and May.

Iris Kaempferi—Japanese Iris.

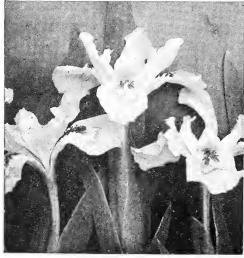

Iris Sibirica-Siberian Iris.

German Iris, Lord of June.

Iris Pumila in Rock Garden.

Iris Cristata.

Iris Germanica (German or Flag Iris)

The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it. It throws up spikes of bloom that are marvelous in their delicacy of structure and the colorings which are exquisitely dainty are wonderful in their blendings and variety.

They are very effective planted in groups and if used for borders are particularly desirable in that the foliage remains fresh and upright after the blossom stalks are removed.

Plant in late August or early September preferably. Spring will do also.

The roots offered in this list are from plants transplanted a year ago and are of a size large enough to bloom next Spring. The collection is up-to-date and consists of the best and newest standard varieties.

Twenty-five roots at 100 rate, 250 roots of a kind at 1000 rate. We guarantee the usual Wayside Gardens quality. The letter "S" refers to the standards or upright petals; "F" the falls or drooping petals.

CHOICE NEW INTRODUCTIONS

Ambassadeur (Vilm., 1920). S. a fascinating smoky velvety purple color; F. velvety purple-maroon; beards and style yellow. A magnificent and regal flower of great substance. 48 inches	Each,	\$0.45
Ballerine (Vilm., 1920). Pall. S. light blue-violet, broad and waved at the margin; F. a deeper shade; sweetly scented. A splendid, tall, stronggrowing Pallida form. 36 to 48 inches	Each,	\$2.00
Ceoil Minturn (New). Soft Cattleya rose. A beautiful flower with broad petals, gracefully waved and crinkled; one of the finest Irlses for size and extreme beauty	Each,	\$0.20
Lent. A. Williamson. Rated in 1922 by the American Iris Society as the finest Iris in the world. S. Campanula blue-violet; F. rich royal purple with yellow heard. Very tall and distinct	Each,	\$0.35
Lord of June. S. lavender-blue; F. rich violet-purple. A magnificent variety of gigantic size	Each,	\$0.75
Mme. Chobaut (Denis, 1916). 36 inches. A clover- scented Plicata type. Prussian-red with light brownish veins, on a pale chalcedony ground. One of the most beautiful of all Iris	Each,	\$0.75
Mother of Pearl. Mr. E. B. Williamson, originator of Lent. A. Williamson, America's highest rated Iris, says, "Mother of Pearl, standards and falls pale bluish lavender with a faint creamy undertone. Large flowers of exceptional substance and perfect form on well branched stems. Vigorous in growth and producing its wonderful flowers freely."	Each,	\$0.75
Queen Caterina (Sturt.). A midseason variety of a beautiful clear orchid-purple veined with bril- liant gold; the whole being further enhanced with a bright orange beard, producing at least twice as many flowers as Pallida dalmatica	Each,	\$0.15
Shekinah (Sturt.). A delightful shade of pale yellow shading to amber in the throat, with a lemon colored beard. This is a true yellow Pallida, and the first of the type. A most uncommon and very handsome variety	Each,	\$0.35
Souvenir de Mme. Gaudichau (Millet, 1914). A rich, deep velvety purple Iris; of fine shape and finish. Tall, early, and very distinct. One of the most striking and remarkable of all. 42 inches	Each,	\$ 1.25

We do not offer new Irises until they can be sold at reasonable prices and come up to a standard set by us, which calls for a worth while improvement and not simply an addition.

GENERAL LIST OF GERMAN IRIS

Varieties marked with (*) have distinctive points of real merit, and are in our opinion the best of the moderate priced varieties. All inferior kinds have been removed from this list.

All interior kinds have been removed from	tillis	mst.	
Alcazar (Vilmorin, 1910). Certificate, N. H. F., 1909; F. C. C. R. H. S., 1916. S. light bluish violet: F. deep nurple	hree	Doz.	100
with bronze-veined throat. Striking flower	0.85	\$2.50	\$18.00
*Archeveque (Vilmorin, 1911). Certificate, R. H. S., 1916. S. deep purple-violet; F. deep velvety violet. 24 inches	.65	1.75	12.00
Brooksiana. Charming flowers of neat form, self-colored delicate rose-lilac, without veining. Beautiful in masses	.45	1.10	6.00
Caprice (Vilmorin, 1904). Certificate, N. H. F., 1916. S. rosy red; F. deeper rosy red. Large and handsome. 24 inches	.65	1.75	12.00
Fairy (Kennicott, 1905). White, delicately bordered and suffused pale blue. The tallest standard variety giving a white effect. Not new but not known or appreciated as it should be. 40 inches	.55	1.50	10.00
Helge. Lemon-yellow with pearl shading.	.40	1.00	5.00
*Isoline. Round standards of pale pinkish buff, strongly flushed mauve; the sharply reflexed falls are Chinese violet with russet tints at the sides; bewildering shades but most attractive	1.00	3.00	20.00
Juniata. A stately plant with gracefully carried mauve to manganese violet blossoms	.45	1.10	6.00
*Jeanne d'Arc (Verdier, 1907). S. very large and ruffled, somewhat spreading, white, delicately penciled lilac; F. white edged lilac at base. The standards being somewhat loosely held, flutter in the breezes in a truly delightful manner	, 65	1.75	12.00
*King of Iris (Goos & Koenemann, 1907). A. M., R. H. S., 1916. S. clear lemonyellow; F. rich maroon, bordered yellow. Brilliant colors. Large flowers. Very fine. 24 inches	.65	1.75	12.00
Loreley. Light yellow, blue falls bordered cream	.45	1.10	6.00
*Leonidas. Standards clear mauve; falls rosy mauve. Big, of fine form, handsome	.45	1.10	6.00
*Loute (Vilmorin, 1904). S. light mauve with bronze sheen; F. soft red-violet, very large flower	.50	1,25	8.00
Madame Chereau. White, elegantly frilled with a wide border of clear blue	.45	1.10	6.00
Mandraliscae. Rich lavender-purple, tall, large and handsome; very early	.45	1.10	6.00
Monsignor. It possesses a distinctive and pleasing shape, rich coloring and a dark outline to the segments for emphasis. Standards violet; falls heavily veined purple, leaving a border of the violet; late to flower	.50	1.25	8.00
Mrs. Alan Gray. A delicate lavender-pink that appears pinker in the shadow, a variety of rather early bloom	.45	1.10	6.00
Midnight. A rich, deep purple, the finest in this color; a fine cut flower	.55	1.50	10.00
Ribelungen (Goos & Koenemann, 1910). S. fawn and yellow; F. violet-purple on bronze. Very large flowers; strong, vigorous grower	.55	1.50	10.00

Irís Germanica (Storm Cloud).

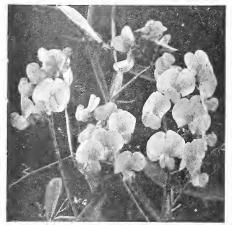

Iris Germanica (Madame Chereau).

THE WAYSIDE GARDENS CO., MENTOR, OHIO

Leontopodium—Edelweiss. No rock garden is complete without this plant.

Lathyrus Latifolius. A splendid, rapid growing vine.

Linum Narbonnense.

Lychnis Chalcedonica.

Viscaria splendens. Brilliant red	.55	1.50	10.00
Viscaria splendens alba. Flowering profusely in June and July; it is one of the best white flowers at that time of the year. 8 to 10 inches high; fine border plant	.55	1.50	10.00
LYSIMACHIA (Loosestrife).			
Clethroides. Long, recurved spikes of pure white flowers, from July to September. A desirable variety. 2 feet	.75	2.00	15.00

Lily-of-the-Valley. For garden planting we use the Giant Fortin type only.

Liatris Pycnostachya.

Lilium Davuricum.

Lilium Auratum. Likes a cool, moist spot in the garden.

Lilium Canadense.

Lilies

Hardy Garden Varieties

Noble and beautiful flowers which are too frequently strangers in American gardens. It is always with a touch of sadness that we note the infrequency of Lilies in American gardens. No flower, it seems to us, is at once so noble and so beautiful. Nor is there lack of variety. Furthermore, the Lily is singularly valuable for its charming effect on the skyline of the garden when in bloom.

There is a notion that Lilles are "hard to grow." Some of the rarer species are, it is true; they not only stubbornly refuse to make themselves at home in the garden, unless conditions are precisely to their liking, but some of them cannot endure the northern Winter without the necessary covering of litter, which many other tender plants require. Unless one goes in for Lilles to the extent of making a hobby of them, however, these can all be left to the collector and there will be quite enough species remaining to give one a Lilly season in the three months duration of which loveliness follows loveliness with breaks of only relatively brief length. We say species for the reason that the Lilles in cultivation show an exceptionally low percentage of horticultural varieties. Possibly because Nature made every species perfect to begin with, the hand of the hybridizer has been loath to endeavor to "paint the Lily," as it were.

The varieties which we offer in these three pages are such as have, with us, withstood the Summer's drought and the severest of Winters, and have thus proven themselves worthy of a place in your garden.

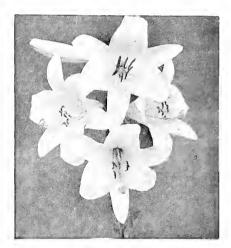

DELIVERY—This depends upon the arrival of the bulbs from our foreign sources. Many get here too late for Autumn planting, thus necessitating carrying over the bulbs until Spring. Those marked (**) should be planted in the Fall only; those marked (*) may be planted in Spring or Fall, preferably the latter; all the others are for Spring delivery.

Auratum (Gold-Banded Japan Lily), Undoubtedly one of the finest. Its large graceful, fragrant flowers are composed of six petals of a delicate ivory-white color, thickly studded with chocolate- crimson spots and striped through the center a golden yellow; 3 to 5 feet. July to September.		Doz.	100
Large bulbs\$ Mammoth bulbs			\$25.00
	1.10	1.00	80.00
Auratum platyphyllum. Also called "Macranthum." This is a robust growing form; the stem is stouter and attains a greater height; the leaves are much broader; enormous flowers, white, richly spotted yellow. Undoubtedly the choicest of all.			
Large bulbs	1.40	5.00	35.00
Mammoth bulbs		6.00	50.00
Auratum rubro vittatum. Similar to the above but the flowers are dark rose-pink.	3.00	10.00	75.00
Auratum pictum. Is another splendid form of Auratum and fortunately a stronger grower	1.75	6.00	50.00
Batemanni. Strong stems with five to ten flowers of a reddish orange color. July-August. 3 to 4 feet	.90	3.00	20.00
Browni odorum. A vigorous grower with large, trumpet-shaped flowers of clear white, veined outside with purplish maroon	2.70	9.00	65.00
maroon	2.10	5.00	00.00
Carolinianum. A showy Lily with slender stems, bearing reflexed, orange-red flow- ers, spotted maroon. Requires a well drained situation. July-August. 2 to 3	1.40	5,00	35.00
	1.40	5.00	55.00
*Canadense. Our dainty, beautiful native Lily. Graceful and charming flowers	.40	1.50	10.00
Candidum (Madonna or Annunciation Lily). This is the old-fashioned garden Lily, and one of the most beautiful. Ready in September only. First size	.90	3.00	20.00
*Chalcedonicum (Scarlet Turk's Cap Lily). Small flowers in loose clusters with re- curved, bright red petals. A handsome and attractive Lily. July. 3 to 4 feet	4.00	15.00	

LILIES—Continued.			
Colchicum (Scovitzianum). A beautiful lemon-vellow Lily, produced in pyram-		Doz.	
idal clusters of drooping, waxlike flowers. June. 4 to 5 feet\$	3.75	\$12.00	\$85.00
*Davuricum. This beautiful Lily comes from the home of L. Tenuifolium in Siberia. It resembles a native Philadelphicum. It is of easy culture, grows two or three to five upright scarlet flowers, dotted black	.50	1.75	12.00
Elegans. (See Thunbergianum, page 34).			
Giganteum (Himalayicum). 5 to 7 feet. July and August. Most majestic of all the Lilies. White, fragrant, funnel- shaped flowers; easily grown	9.00	(Rare	÷)
Grayi. A native Lily with deep red flowers. One of the finest for planting in shady places. Small, rich red flowers, spotted maroon. July. 3 to 4 feet	.90	3.00	20.00
Hansoni. Most desirable; not particular in its cultural requirements and extremely handsome in flower; does well in light loam. Plant among shrubs and low plants to protect young shoots, this being one of the earliest Lilies to appear in the Spring. The stem reaches a height of 4 to 5 feet, carrying blossoms 2 inches across, regularly reflexed, the petals being of a bright orange spotted more or less with brown, of a waxy texture. Admirable for pot culture. June flowering	2.00	6.50	50.00
*Henryi. A new Japanese Lily that has made a sensation in Europe. It has the same form and appearance as the Specio- sum varieties, but the flowers are bright orange-yellow. They are as hardy as a tree. Easily grown and permanent	2.00	6.50	50,00
Krameri. Unique for its color and grows from 2 to 4 feet high. The funnel-shaped, finely formed flowers are 6 inches or more in length and as much across, of a beautiful clear pink color, often shaded blush	1.10	4.00	30.00
*Martagon (Dalmaticum, Turk's Cap Lily). A handsome Lily, bearing clusters of purple, waxlike flowers. Thrives best in partial shade. June. 5 feet	1.75	6.00	45.00
•	.80	3.00	20.00
Philadelphicum. A handsome native Lily with yellow, cup-shaped flowers, spotted maroon and shaded orange at ends of petals. Good for naturalizing, July. 3 feet. Large bulbs	.90	3.00	20.00
Pomponicum. A brilliant red Turk's Cap Lily. Much like Chalcedonicum, but with the heads of flowers rather more loosely arranged. June. 3 to 4 feet 2	.25	7 50	60.00
Pyrenaicum (Yellow Turk's Cap Lily). A Lily of easy cultivation, with many small, yellow flowers, dotted brown. Reflexed petals. June. 3 feet	.80	6.00	45.00
*Regale or myriophyllum (The Regal Lily). It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink, with a beautiful shade of canary-yellow at the center, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the Jasmine, and lacking the heavy, oppressive odor of most Lilies. Blooms out-of-doors early in July.			
Flowering Size. Strong bulbs. 5 to 6 inches in circumference	.00	3.00	20.00
Large Size. 6 to 7 inches in circum- ference	.40	4.00	30.00

Lilium Giganteum Himalayicum.

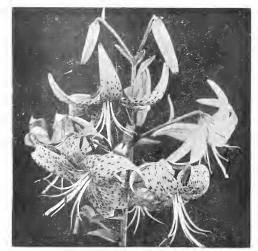

Lilium Candidum. Plant with Delphiniums for a fine effect.

Lilium Regale.

THE WAYSIDE GARDENS CO., MENTOR. OHIO

Lilium Tigrinum.

Lilium Testaceum. The delicate color of this Lily is unmatched in other flowers, even in orchids.

Lilium Speciosum Magnificum.

ENS CO., MENTO	Λ,	0 11	110
LILIES—Continued.			
Rubellum. Beautiful small Lily. The color varies from a deep rose-pink to almost white, with yellow anthers; very fragrant, small funnel-shaped flowers; grows 1½ feet high. It does best in light soil		Doz. \$3.50	100 \$25.00
Speciosum album. The Speciosum or Lancifolium are the most important of all the Japanese Lilies, always satisfactory. The variety here offered has large, white flowers of great substance, with a greenish band running through the center of each petal.			
Large bulbs		4.00 6.00	$\begin{array}{c} 30.00 \\ 50.00 \end{array}$
Speciosum magnificum. Magnificent large flowers of rich deep red.			
Large bulbs		3.00 4.00	22.00 30.00
Speciosum Melpomene. A darker shade of red and crimson markings than the preceding.	;		
Large bulbs	.80	3.00	22.00
Mammoth bulbs		5.50	40.00
*Superbum. 3 to 4 feet. July. Flowers bright reddish orange, conspicuously spotted; easily grown and permanent		1.50	10.00
*Testaceum (Excelsum or Nankeen Lily). This is one of the finest of all Lilies. The color is difficult to describe, being a shading of dull apricot with orange-yellow anthers. A most graceful Lily and a good companion to L. candidum. June-July. 5 feet. Extra large flowering bulbs; easily grown and permaneut		23.00	150.00
*Tenuifolium. A small, slender growing Lily, not more than 18 inches high, with bright scarlet flowers and recurved petals. One of the prettiest little Lilies in cultivation. Early June. 12 to 18 inches		4.00	
*Golden Gleam. A beautiful type of L. tenuifolium, with flowers of a beautiful apricot shade. A free and vigorous grower	l ;	6.00	50.00
Thunbergianum (elegans). Very hardy, dwarf Lilies thriving in any garden and producing large, erect flowers of various shades of yellow, orange and red. All varieties grow from 1½ to 2 feet and bloom during June and July. Mixed Colors		3,00	20.00
Thunbergianum (elegans), Alice Wilson. A clear lemon-yellow form of the above. Very attractive		3.25	25.00

PAPAVER - Poppy

The proper planting season for Oriental Poppies is during the last of August, September and October. Roots planted at any other time we do not guarantee to live.

oriental Poppies are the regal representatives of this popular genus, growing 3 to 3½ feet high, and far surpassing in splendor of bloom all the annual and biennial kinds, and for a gorgeous display of rich and brilliant coloring nothing equals them during their period of flowering in May and June, and whether planted singly or in masses their large flowers and freedom of bloom render them conspicuous in any position. They are of the easiest culture; almost any kind of soil suits them, but they do best in deep, rich loam. Set the plants out in the Fall or early Spring before the first of May—give them water occasionally during dry spells in the early part of the season. Mulch with stable litter in the Fall; and they will increase in size and floriferousness for several years. We offer the best of the latest introductions, as well as the distinct standard varieties.

Duchesse de Nemours.

Peonies

The varieties we offer are arranged alphaeetically, and where known, the name and date of the introducer immediately follows in parentheses. As color comes first in the choice of Peonies, we have placed the color on the same line as the name. Size and type naturally appeal next, and so follow the color. Having found these satisfactory in any variety described, one naturally looks for the character and habit of the plant. To further aid purchasers we shall be pleased to give by letter further information to intending purchasers.

Figures following name indicate rating by American Peony Society.

3-5	Eyes	
Albert Crousse, 8.6. (Crousse, 1893). Very fresh salmon-pink, delicate color. Large compact bomb shape; fragrant; erect; medium height. Late\$8.00	100 \$60.00

New Japanese Peonies

A type not very generally known, but in every community, wherever established, is awakening great interest and enthusiasm. The opened flowers are of extra wide spread, with one or more layers of broad guard petals which act as a cup to the mounded center. In place of the pollen-bearing stamens which center the Single Peony flowers, in this class the stamens and anthers are greatly enlarged into narrow, thick, twisted petaloids of various colors, forming a dense cushion. We heartily recommend our list to those who want something different from the other fellow's; and to Peony planters generally, as types which will add zest and beauty to their gardens.

rardens.

Orders for the following booked now for September delivery.

Strong Divisions, Each

No. 15. Fuyajo. This is the darkest, richest and most distinctively Japanese of our group. Broad, rounded guards of dull—although velvety—mahogany. The fine, curly petaloids form a conspicuous, dense center; garnet, streaked on reverse side and heavily tipped with light bronze

10.00 6.00

5.00

and gold. Many centers are slightly tufted

No. 47. Fuji-zome-gorono. Inexpressibly beautiful in its matchless symmetry and delicate color tones. Immense, flattened, poppy-shaped flowers borne very freely. The two-layered guards are broadly rounded, an exquisite shade of satiny, wisteria-pink. The crinkly cushion is pure gold, toned warmly towards the base with coral. A most charming color combination

No. 88. Oki-no-nami. Tall, free-flowering and showy. Pale hydrangea-pink; with full, fine-cut center of peachpink and cream. It does not require a strong imagination to get the Japanese descriptive impression

No. 135. Kara-ori-nishiki. This shows uniquely fluted

No. 135. Kara-ori-nishiki. This shows uniquely fluted petals, with ends deeply indented. These are white, irregularly streaked and tipped with lilac-red. The center is medium sized, but bright with deep gold filaments, and carmine seed pods 5.00

Single and Semi-Double Peonies

An interesting class bearing a general resemblance to the Japanese species. They have one or two rows of large, rounded guard petals, with distinct centers of pollen bearing stamens in some shade of yellow.

estance. A useful landscape type with long, nodding stems and semi-double flowers 8 to 10 inches across. Ruby buds open to solferino-red permeated with crimson and faintly edged silver, clouded with violet on reverse; with conspicuous yellow cushion\$ 1.00 Defiance.

reverse; with conspicuous yellow cushion

Lotus. One of the very earliest blooming Peonies, but keeps right on with the midseason type and still shows its stars when the late doubles usher in the end. Blooms keep in water as long as ten days. It is a strong grower with dark leaves, and long, rigid stems. Flowers are borne in clusters of three to five. The small center is dense and showy; bright gold with carmine seed pods. Color at first is warm pink, fading gradually to pure white, the center remaining constant

Marie Jacquin (The Water Lily Peony). Beautiful single and semi-double flowers in over-topping abundance; the waxy, pure white cups with crowded center of golden stamens, creating the delightful impression of water lilies riding the surface of a moss green pool

Choicest Imported Hybrid Delphiniums

The range of colors varies from the palest shade of blue to the deepest indigo blue and royal purple with many intermediary pastel tones of mauve, pink and la vender blendings. Among these new hybrids are flowers of huge size in both single and double forms. This strain has been raised from seed saved from the finest named kinds in creation. Visitors at our nursery proclaim them the best they have ever seen. Those who wish to perfect their already much prized borders cannot afford to overlook these wonderful hybrids. Per 3, \$1.00; per doz., \$3.00; per 100, \$20.00—for two year old plants.

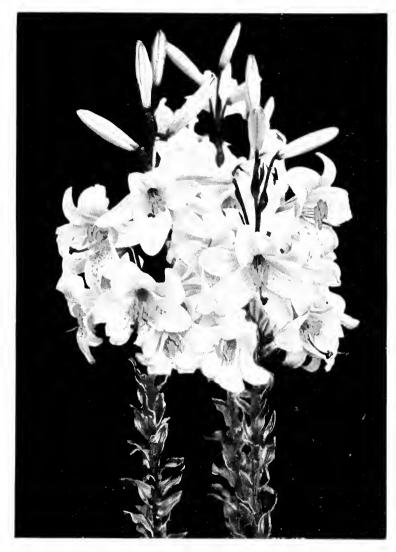

Daphne Cneorum

THIS prostrate growing shrub may be classed among the aristocrats of the rock garden. While this evergreen fits perfectly in that setting, it can be planted around sundials or pools or at the base of a Rhododendron or evergreen bed. Again, it can also be used for an edging or as a carpeter and wherever used, it will stand out as one of the "richest" looking plants in the garden.

The following briefly and correctly sums up its excellent points: Growth slow. Foliage evergreen dark and glossy. Flowers rose-pink completely covering the plant in May and again in late September. Odor of flowers incomparable. Height of plant about 6 to 8 inches. Its requirements are simple. Should have full sun, do not give it any lime or fertilizers of any kind. It loves a poor gravely, sandy dry soil. Heavy clay soils should be lightened by mixing sand or coal ashes—proportions about 50-50. In very cold climates with little snow, the plant should be covered by a small empty box, evergreen branches or a little dry straw during January and February to prevent the "winter burning" of foliage. It will withstand temperatures with the above protection as low as ten below zero. Plant it in a dry place.

It has taken us several years to build up a stock of this scarce plant, but we now have sufficient plants on hand to make this unusually low offer, enabling every gardener to have some.

Fine bushy plants, 10 to 12 inches in diameter, \$1.00 each; doz., \$10.00; 100, \$75.00. Fine bushy plants, 12 to 16 inches in diameter, \$1.50 each; doz., \$15.00; 100, \$125.00.

Lilium Candidum

(MADONNA LILY)

Choice Northern Grown. Arrive in August or September.

AETERLINCK refers to this loveliest of Lilies when he says: "The great white Lily, the old lord of the gardens, the only authentic prince among all the commonalty issuing from the kitchen-garden, the ditches, the copses, the pools and the moors, among the strangers come from none knows where, with his invariable six-petaled chalice of silver, whose nobility dates back to that of the gods themselves, the immemorial Lily raises his ancient scepare, august, inviolate, which creates around it a zone of chastity, silence and light."

Be very careful that you plant the right to the gods the grown of the strangers.

silence and light."

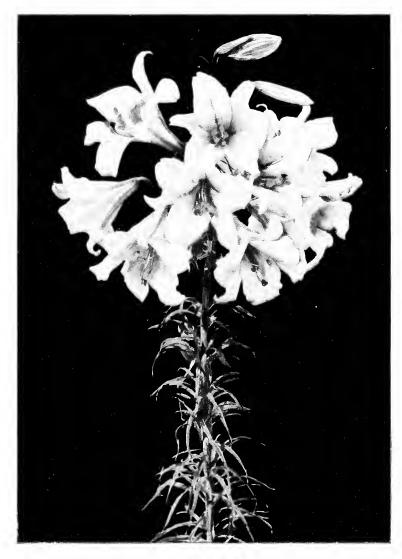

Be very careful that you plant the right type of this beautiful Lily in your garden. There is an early-flowering variety which is grown in the south of France. These should not be used in America; if planted in the garden, they are prone to disease and are unsatisfactory. In Europe this type is called L. candidum speciosum. This variety is only too often sold because they cost less

The true type to use for the garden is the L. candidum from the north of France; is easily recognized by its white, fleshy scales, by those that know both types.

Plant in loam or sandy soil, in an open, fully exposed place, surrounding the bulb with sharp sand and placing it somewhat on its side. After it has become fully established leave it alone as it much resents disturbance at the roots. If necessary to transplant, do so as soon as the flower stems die down.

Lilium Regale or Myriophyllum

ROWING anywhere under almost any condition, establishing itself without any trouble or effort on your part, it is in our mind the easiest and one of the most beautiful, and hardiest Lilies in cultivation. Lilium Regale is truly a royal Lily, worthy of a place in every garden. A vigorous grower with sturdy stems: 4 to 5 feet high, densely covered with long, lanceolate foliage. Center of flower flushed with yellow, shading to white at the outer edges; externally the flowers are streaked with brown, shaded through the almost translucent petals with a delightful pearly tint; the contrast between the rich color of the reverse of the petals and the gold shading of the throat is extraordinarily beautiful. Thrives in any good rich soil and is the easiest of all Lilies to grow. Stem-roots; plant Fall or early Spring, about 5 inches deep. July flowering. In order to bring this unusually handsome Lily into the hands of every flower lover and gardener we offer it in 5 sizes, the smallest of which will produce 3 to 4 good flowers, not as many on one stem as is shown in the illustration which is a spike produced by an 8- to 9-inch bulb. (Our stock is the largest in cultivation in America).

PHLOX

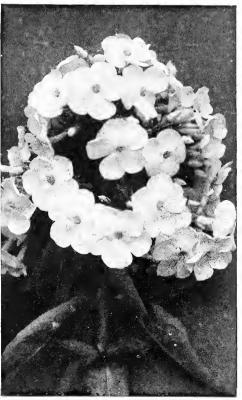

PHLOX DECUSSATA (Hardy Phlox).

Perennial Phlox succeed in almost any soil enriched with manure in Spring, and in hot weather an occasional soaking of water. If the first spikes of bloom are removed as soon as over, they will produce a second supply of flowers, continuing the display until late in Autumn. These later blooms are often finer than the first.

PRIMULA - Hardy Primrose

Splendid little plants for naturalizing near shrubs, in the border or shaded nooks on the rockery.

Three Doz. 100

Auricula alpina. One of the treasures of the rock garden. The growth is very attractive, forming rosettes of thick leaves, sometimes farinose or mealy. From these rosettes the flower stalks rise to a height of six or eight inches, bearing heads of bloom of various colors and exceedingly fragrant\$1.00 \$3.00 \$20.00

Cashmeriana. (New). Large, globular heads of a pleasing purplish blue shade; prefers a moist, shaded situation 1.40 4.00 30.00

Cortusoides. A distinct Siberian species, with soft, wrinkled, heart-shaped leaves. Flowers in early Summer, deep rose. Prefers light, rich, well drained soil, in a sunny position, in border or rockery; 10 inches

Moerheim Hybrids. A new strain of Hardy Primulas with the constitution of P. japonica, resulting from crossing of several. Color range from cream to many shades of yellow, orange, purple, lilac, pink and crimson. They are very hardy and prefer a half-shaded position that is fairly moist; very unusual 1.20

POLYANTHUS (Bunch Primrose).

The Polyanthus is an indispensable Spring flower and should be used largely in flower beds and borders, also wild gardens and rockeries. It likes an open, half-shady position in rich soil and under such conditions will bear flower stems a foot high.

100 Exhibition Yellow. A very beautiful strain. having flowers from deep to light yellow. \$1.00 \$3.00 \$20.00 4.0030.00 Munstead Strain. In shades of yellow, from cream to dark orange, selected and perfected by Miss Jekyll of England. 1.00 3.00 20.00 3.00 20.00 2.50 18.00

POLYGONATUM (Solomon's Seal).

POTENTILLA (Cinquefoil).

Charming plants for the border, with brilliant single or double flowers that are produced in profusion from June to August. Succeeds in any soil. 18 inches.

Tridentata. Dwarf evergreen plant. Excellent for the rock garden	85	2.50	18.00

PRUNELLA (Self-heal; Heal-all).

Grandiflora. Violet or purple flowers all Summer. Fine for the rockery or slightly shaded parts of the hardy border. Succeeds in any soil not excessively dry. .65 1.75 12.00

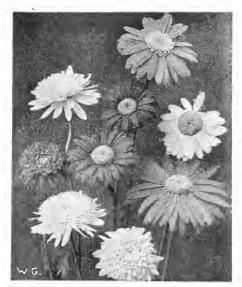

Primula Auricula.

Primula Veris.

Polygonatum Multiflorum Major.

Pyrethrums.

Saponaria.

Salvia Azurea.

PYRETHRUM (Persian or Painted Daisy).

The Pyrethrums are so simply and easily cultivated that they may be recommended to all who possess a garden. They are perfectly hardy and absolutely invaluable for cut flowers through the Summer and early Fall. The flowers are bright and elegantly borne on long stems; most convenient for decoration. In form, the double varieties are somewhat aster- or chrysanthemum-like, and as their chief beauty is in the months of May and June, they may well be designated Spring Chrysanthemums, possessing the advantage over the Chrysanthemums of being able to withstand the severest Winter without protections.

anthemums, possessing the advantage over of being able to withstand the severest W tion. The single-flowered varieties are v guerites and possess a range of color and guerites might envy in vain. Nothing cathrum in profusion of flowers throughout from May to July, and the blossoms are nor sun. As a cut flower, their long stems decorative purposes. Their position should in beds.	n sur the not in make l be i	pass the entire so jured by them ion the bo	e Pyre- Summer y storm leal for order or

EUONYMUS (Evergreen Bittersweet).

The trailing Euonymus are particularly desirable for their dense, evergreen foliage and extreme hardiness, some varieties on account of this taking the place of the English Ivy for wall covering, others that of the boxwood as an edging plant. Makes a splendid ground cover, and one of the best creepers for rockeries. Plants offered below are 4- to 5-year-old specimens. Three Doz.

Carrieri (Carrier's Evergreen Bittersweet).

A stronger grower than Euonymus radicans with larger ovate green leaves. Half bush and half vine in habit of growth. If given support, it makes a very fine covering for a building or a wall; very rugged and a rapid grower, which may be used for evergreen hedges, as it can be sheared into any shape ...\$1.00

\$3.00 \$20.00 Kewensis. 20.00 3.00 25.00 4.00 30.00 Badicans variegata. A beautiful small-leaved green and white variegated form of the same habit as the type 1.00 3.00 20.00 of the same habit as the type 1.00 Radicans vegetus (Evergreen Bittersweet). A strong growing variety, with larger leaves than the type, and producing bright orange-red berries, which remain on the plant the greater part of the Winter. As an evergreen, absolutely hardy wall cover, this plant is unequalled ... 1.75

ENGLISH IVY (Hedera).

The famous English Ivy with its familiar evergreen, glossy foliage is unfortunately not very hardy in this climate, and requires Winter protection where it is exposed to chilly winds on open walls. It can, however, be planted with perfect safety as a ground cover or as an edging to flower beds.

Helix (English Ivy). 4-inch pots\$1.20 \$25.00 30.00

LONICERA (Honeysuckle).

Their vining qualities are all that can be desired, but the fragrance of their flowers makes their strongest bid for favor.

Three Doz. 100

\$3.00

POLYGONUM (Silver Lace Vine).

Auberti. A splendid hardy climber, of strong, vigorous growth, attaining a height of 25 or more feet, producing during Summer and Fall great foamy sprays of white flowers, and a well established plant during its long period of flowering is a great mass of bloom. 1.40

PUERARIA (Kudzu Vine).

The most rapid growing vine in cultivation, often attaining a growth of 40 feet in a single season. Especially desirable for immediate effect for dense shade, as its leaves are large.

Three Doz. 100

hunbergiana (Jack-and-the-Bean-Stalk).
Small, pea-shaped, rosy purple flowers,
heart-shaped leaves. It will grow anywhere. Field-grown plants\$0.85 \$2.50 \$18.00

WISTERIA.

Woody vines with tightly clinging habit, for pergolas, arbors, trellises, etc., especially ornamental in early Summer when they are resplendent with their large, drooping clusters of fragrant blossoms.

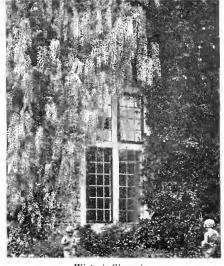

Three Doz. \$5.00 \$40.00 Sinensis alba. A white-flowered form of the type. Strong plants 1.75 40.00 5.00

Clematis Jackmani.

Euonymus Radicans Variegata

Wisteria Sinensis.

Hardy Shrubs and Azaleas

For the Hardy Border or Rock Garden

Azalea Mollis.

Buddleia Magnifica.

Cotoneaster Horizontalis.

HARDY AZALEAS

The varieties here offered are the hardiest and most desirable for general garden planting; until thoroughly established it is beneficial to give them a heavy mulch of leaves during the Winter, and a loose covering of evergreen branches to protect them from the sun and drying winds during freezing weather.

	-	
AZALEA (Pinxter Flower; Swamp Honeysuckle).		
	Each	Doz.
Amoena (Japanese Evergreen Azalea). A dwarf		
shrub with double purplish red flowers in May;		
is especially adapted for borders and rock gar- dens; needs some protection in northern latitudes.		
Should be planted in sheltered positions and will		
abundantly repay for any care given it	32.00	\$20.00

HARDY SHRUBS

Varieties Used With Herbaceous Plants in Hardy Plant Borders and Bock Gardens.

The few varieties listed below are used to mplants in borders and rock gardens.	ix with	hardy
BUDDLEIA (Summer Lilac).	Doz.	100
Farquhari (New). A low-growing pendulous, spreading shrub, with rich green foliage and silvery reverse, bearing in late Summer long racemes of purple flowers		
Variabilis magnifica (Butterfly Bush). This is properly a shrub, but the top usually freezes back, and new growth starts from the root like other perennials. Plants grow three to four feet and are covered with long racemes of lilac-like flowers in July. The best location is in good, rich, well drained soil in a sunny situation	4.00	30.00
CARYOPTERIS (Blue Spirea).		
Mastacanthus. A handsome hardy perennial; grows about 3 feet high and produces rich lavender-blue flowers in great profusion the whole length of the branches. A valuable plant either for bedding or pot culture, blooming continuously from early in September until cut by frost	3.50	25.00
COTONEASTER (Rock Spray). Horizontalis (Prostrate Cotoneaster). A low shrub with almost horizontal branches. Native of China. Leaves dark green, about half an inch long; flowers pinkish white; fruit bright red; attractive in rockeries. A most desirable ground cover, and should be largely planted. Cannot be transplanted unless from pots. Strong, 5-inch pot plants 2.50	8.00	60.00
DAPHNE (Garland Flower).	_	7.00
Cneorum. Handsome dwarf sub-shrubs; excellent for planting near front of shrubberies, with odorous pink flowers and handsome foliage	Doz.	
Bushy plants, 10-12 inches \$1.00 Bushy plants, 12-16 inches 1.50	15.00	125.00
DESMODIUM (Tick Trefoil). Three	Doz.	100

\$25.00

\$3.50

ERIC	CA	(H	ea	th)	
6723	**		•		

The Heaths are compact, low-growing plants, and as such are extremely useful for rockeries. The small foliage is densely arranged around the wiry little stems, and either when in full bloom or in midwinter makes a very pretty picture. Give some protection in the first Winter. Semi-shady location. All our Ericas are strong, bushv plants.

some protection in the first Winter. Semi-shady location.	All
our Ericas are strong, bushy plants.	
Each Doz.	100
Elata alba (White Heather). The nodding	
white flowers are the only diversion	
from the Vulgaris; a pleasing contrast.	
Big clumps\$1.00 \$10.00	
Nana compacta. Dwarf and compact;	
pink. 9 inches. Big clumps 1.00 10.00	
Vulgaris (Scotch Heather). A dense-	
growing shrub, with erect branches,	
covered with short, closely adpressed	
leaves. The pretty, bell-shaped flowers	
occur in great profusion toward tops of	
the shoots and are a pretty rosy color.	

Big clumps 1.00	10.00	
HYPERICUM (St. John's Wort). Calycinum (Aaron's Beard). Rapidly growing sub-shrub and ground cover in sun or shade, with golden yellow flowers.	Doz.	100
1 foot. July-August\$1.00	\$3.00	\$20.00
Henryi. The same as Moserianum, though slightly more upright in growth and much hardier and better suited for cold		
climates 1.00	3.00	20.00
Moserianum. A most desirable border		
plant, of free and graceful habit, pro- ducing long, slender, much branched		
stems, leafy to the base and all droop-		
ing towards the ends, apparently from		
the weight of the flowers and buds, al-		
though the flowers face so none of their beauty is lost. It is marvelously free-		
flowering, of large size, measuring from		
2 to 2½ inches in diameter; in color a		
rich golden yellow, rendered still more effective by the numerous yellow sta-		
mens and crimson anthers, and blooms continuously the entire season. 2 feet85	2.50	18.00

continuously the cartie season, a feet it its		20.00
VITEX (Chaste-tree; Hemp-tree). Each	Doz.	100
Macrophylla. In general habit similar to		
V. Agnus Castus, but much stronger in		
all its parts, the foliage being larger		
while the trusses of lavender-blue flow-		
ers are fully double the size. It blooms		
from July to September: as popular as		
the Butterfly Shrub, to which we con-		
sider it superior\$1.00	\$10.00

BOXWOOD.

We are glad to be able to offer this valuable shrub again and at a price everyone can afford. The stock we offer is bushy and wide, excellent for edging walks or beds. Contrary to the usual idea, Boxwoods are hardy and will stand a temperature of 10 below zero without any damage, providing the plants are protected with a little lath screen, admitting air and light, but giving enough shade so that the sharp sun during the months of December, January and February, does not burn the foliage. Grows in any soil. Plant 4 inches apart.

Grows in any soil. Plant 4 inches apart.	100	1000

plants as follows: 4 to 6 inches high	$^{\$12.00}_{20.00}$	\$110.00 190.00

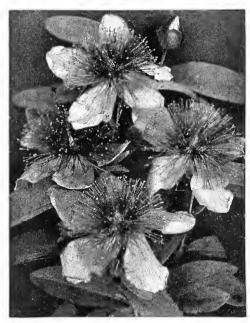

BOX BARBERRY.

The new dwarf or miniature Berberis used for low edging around beds in formal gardens or for dwarf small edges along garden paths Requires little pruning and is the best dwarf edging to be used in localities where Boxwood is not hardy and is less expensive.

Box Berberis. Bushy plants.	Doz.	100	1000
8 to 12 inches			

Erica-Heath.

Hypericum.

Barberry Hedge.

Brief Suggestions for Planting Roses

PON the arrival of the plants, open the bundle in a sheltered place and soak them thoroughly, or immerse the plants in a pail or tub of water for a few hours. After removing them from the water, cut away broken or damaged roots. Take care not to expose the roots to sun and wind.

The ground should be thoroughly prepared, breaking the subsoil. To do this, it is necessary to dig 15 to 18 inches deep and to mix a liberal supply of well-rotted manure or other fertilizer with the soil. A little air-slaked lime will help sweeten it.

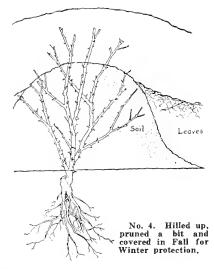

Dig a hole large enough to accommodate the roots and spread them on the bottom of the hole, in the same position as you would place your hand on a flat surface. When filling it, lift and shake the plant lightly in order that the soil may sift between the roots, and after this operation, firm with the hands and feet. Be sure that the lower parts of the lower branches are at least 2 inches below the surface of the soil. (Picture No. 1.) Do not plant on a mound, the surface should be level, or a slight depression left around the plant. Cut back the branches within 2 to 4 inches of the surface of the ground, leaving the stronger branches 4 inches high above the soil. (Pictures 2 and 3).

In cultivating Roses, the soil cannot be kept too tight at the roots and too loose on the surface during the growing season.

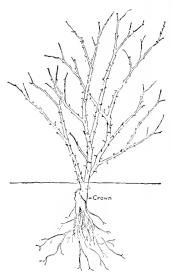

The branches of Climbing Roses should be cut back to 18 to 24 inches. A few flowers will develop the first year, by using this idea, although our method is to cut back the Climbers, when they are being transplanted in our Nursery, to within 2 to 4 inches of the main stem of the plant. Climbing Roses pruned this way will eventually give most satisfactory results.

In Fall, just before cold weather sets in and frost enters the ground, mound the soil around the branches of the plant at least 10 inches high, and cover with a little straw or some other loose litter. This will

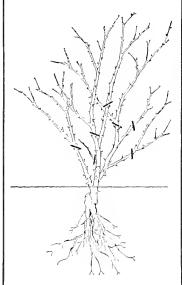

prevent the wind and sun from drying the branches during the Winter. (Picture 4).

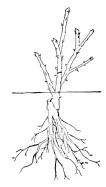

Write for our most complete pamphlet on how to take care of roses. A copy will be sent gladly upon request.

Hardy Everblooming Hybrid Tea Roses

Under this heading we offer only the very best and most popular, well tried varieties of Hybrid Tea Roses, with the majority of which every lover of the Rose is familiar. We recommend this collection for general planting to the amateur who wishes the finest varieties, and who is desirous of a supply of extra choice flowers to cut throughout the season. There is not one individual sort which we cannot endorse as possessing superior merit; all having been thoroughly tested.

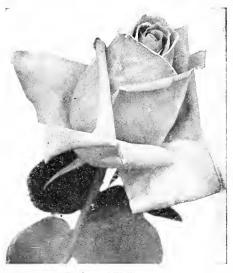

having been thoroughly tested.		
Each Betty Uprichard. One of those delightfully contrastive types; the outside a blend of deep toned carmine with coppery orange; the interior being mostly a delicate salmon-pink. Strong garden variety; sweetly fragrant \$1.25	Doz.	100 \$100.00
Chateau de Clos Vougeot. This is one of those lovely shaded reds so dark as to suggest the richness of velyet. It is sweet-	\$15.00	\$100.00
ly fragrant and a very continuous bloomer. Rather dwarf growth	9.00	70.00
Caroline Testout. One of the most popular and valuable bedding varieties; large, full, globular flowers of bright satiny rose, with brighter center, very free and fragrant. The Rose that made Portland, Oregon, famous as the Rose City80	9.00	70.00
Columbia. This beautiful Rose is not only one of the most popular Winter flowers, but has also proven itself a good bedding or garden variety. It is of strong, vigorous habit and exceptionally free blooming. The flowers, of good size, are perfect in form, both in bud as well as when fully expanded. Color a most pleasing shade of rose-pink and delightfully fragrant	9.00	70.00
Charles K. Douglas. An English Rose of vigorous, upright growth, and liberal, fragrant bloom which is of delightful form. Color a flaming scarlet flushed with velvety crimson	11.00	90.00
Crusader. Large, massive, high pointed buds and full double flowers on stiff stems; fine for cutting; color a rich crimson; particularly good in late Summer and Fall80	9.00	70.00
Claudius Pernet. We give below Mr. Pernet-Ducher's own description. "A most vigorous grower of erect branching habit, beautiful, brilliant green foliage, long pointed buds of exquisite shape, carried on long, stiff stems. Very large, full flowers with elongated deep petals; a beautifully formed bloom. Color most striking sunflower yellow, deeper in the center, without any color blending, and which is retained without fading even in the warmest weather." Strong, 2-year-old plants 1.00	11.00	90.00
Duchess of Wellington. The most popular yellow garden Rose. Intense saffron-yellow, stained with deep crimson, changing to a deep coppery saffron-yellow as the flowers are fairly full, with large petals, great substance, delightfully fragrant and very free flowering	9.00	70.00
Earl Haig. A type rare among red Roses, and so of obvious interest to the selective buyer. Outside of its fragrance, freedom and unfading cherry-crimson color; the thick, rolling petalage, and permanent high-built center, fix its superiority over less compact varieties. A splendid associate with the white "Edel"	16.50	125.00
Elvira Aramayo. A flaming, arresting color newly applied to Roses as "Indian red." This seems to be a unique association of orange-carmine, with tones of madder, salmon and pink. The buds are long and pointed, plentiful, opening into large flowers of cactus shape with some quilled petals; a showy garden type, with straight		
stems and bushy growth	11.00	90.00

Mme. Edouard Herriot. The Daily Mail Rose. In color its buds are coral-red, shaded with yellow at the base; the open flowers of medium size, semi-double, are of a superb coral-red, shaded with yellow and bright rosy scarlet passing to shrimp-						
red Mad. Marcel Delanney. Tender rose color shaded with hydrangea-pink. Flowers	\$0.80	\$9.00	\$70.00			
large, full and fragrant, borne with satis- fying freedom	.80	9.00	70.00			
Mrs. Aaron Ward. A remarkably floriferous variety of strong, vigorous, but compact growth; the flowers, which are of splendid form, full double, are equally attractive when full blown as in the bud state; in color a distinct Indian yellow, shading lighter towards the edges	.80	9.00	70.00			
Mrs. Wakefield Christie-Miller. As a pink bedding Rose there is none better, and particularly so for massing. The flowers, which are of large size, remain perfect on the bushes for a long time, and are produced very freely; they are of a bright pink color with lighter shading; the plant is vigorous and free	.80	9.00	70.00			
Mrs. Chas. Bell. Soft shell-pink with a salmon background. It retains its full globular shape an unusually long period	.80	9.00	70.00			
Mrs. H. B. Darlington. Very shapely buds and flowers of large size and full petalage, waxy cream-white tinctured with yellow at base; fragrant, free blooming. Plant						
growth upright, branching and vigorous Mrs. Redford. One of the most distinctive and desirable Poses of recent introduc-	1.50	16.50	125.00			
tion. Bright apricot-orange; one of the most lovely of this tone of color; an upright grower with holly-like mildew-proof foliage. The flowers are substantially built, perfect in form, very free-blooming and sweetly scented; a superb bedding						
Milady. (H. T.) (Pierson, 1913). Crimson- scarlet. Color similar to Richmond. Flow- ers large, full and well formed; carried on		13.00	100.00			
stiff stems Miss Lolita Armour (Howard & Smith, 1920). The coloring of this variety is difficult to describe, and is absolutely distinct. The flowers are of large size, full double, with petals of great substance and delightfully fragrant. As the flowers expand they develop to a deep coral-red with a golden, coppery red suffusion, the base of the petals a rich golden yellow with coppery red sheen. The plant is a strong, vigorous grower, and very free flowering. At the great Bagatelle Gardens in Paris, France, this was singled out in 1921 for the highest prize, a Gold Medal, while at the Test Garden of the American Rose Society at Portland, Oregon, it was awarded the Silver Medal and Bronze Certificate of the	.80	9.00	70.00			
City of Portland. Strong, 2-year-old California grown plants	.80	9.00	70.00			
Premier. The blooms are immense, often measuring 5 and 6 inches across the open flower; buds long, full and pointed. Growth remarkable, being strong and sturdy, each bloom borne on heavy canes, almost thornless and 4 and 5 feet long. Foliage dark, glossy green, free from disease or insects. Color is deep rose-pink, without shadings and retains its color in the open	.80	9.00	70.00			
flower. Highly fragrant. 2-year plants Radiance. An ideal bedding Rose of American origin that continues to produce its large flowers throughout the most unfavorable hot Summer weather when frequently many other varieties fail; in color	.80	9.00	70.00			
a brilliant carmine-pink, with salmon-pink and yellow shadings at the base of the petals; truly a Rose for every garden	.80	9.00	70.00

Red Radiance. A counterpart of Radiance from which it is a "sport," possessing all the good traits of that valuable variety but differing in color, which is a bright cerise-red	\$0.80	\$9.00	\$7 0 .00
Sensation. (H.T.). Enormous scarlet-crimson blooms of fine deep form; double, 30 to 15 petals of great size and substance; very sweetly scented. Plant is strong and very active in sending up new blooming shoots	.80	9.00	70.00
Souvenir de Claudius Pernet. (See Claudius Pernet, page 57).			
Souvenir de George Beckwith. A strong and vigorous grower of erect branching habit with large, full, globular flowers on good stiff stems; color shrimp-pink tinted chrome-yellow shading to deeper yellow at the base of the petals	1.00	11.00	90.00
Souvenir de H. A. Verschuren. This new variety is a strong, vigorous grower. The center, a beautiful apricet-yellow which shades to saffron-yellow at the edges. The buds are long, of ideal shape for cutting, opening out into full double flowers of good form, and of an intensely sweet tea scent, not found in many other Roses		11.00	90.00
Bunburst. A magnificent giant yellow forcing Rose, also well adapted for outdoor growing, being a vigorous and healthy Rose. Buds long and pointed, borne singly on long, stout stems, opening full and double. An excellent cut flower variety, having excellent keeping qualities. A very vigorous grower, reddish bronze foliage. The color is superb orange copper or golden orange, with a deep orange center. This Rose creates a sensation wherever grown		9.00	70.00
Soleil d'Or. Color varying from orange- yellow to reddish gold, shaded with nasturtium-red		9.00	70.00
Una Wallace. A recent novelty, almost alone in its particular color shade which may best be designated a soft cherry-rose without separation or shading. In size, style and habit there can be little criticism, and its production of sweetly fragrant bloom is very liberal	.80	9.00	70.00
Willowmere. Of coral-red color, suffused with carmine in the bud state, and opens to a large, full, handsome flower of a rich shrimp-pink, shaded yellow in the center and flushed carmine-pink towards the edges.	.80		
william F. Dreer. A beautiful Rose of the same parentage as Los Angeles, and which, for delicacy of coloring, is not comparable to any other variety. The flowers, similar in shape to Los Angeles, are at their beat when half expanded. Color a soft silvery shell-pink, base of petals rich golden yellow, which, at certain stages of development, gives a golden suffusion to the entire flower		11.00	90.00

Sensation.

Radiance.

BABY RAMBLER ROSES

A type of Roses which is deservedly very popular for bedding purposes. They form shapely, compact, bushy specimens, most of them growing about 18 inches high, producing in great profusion, from early in the season until severe frost, immense trusses of small flowers. Pruning is not necessary; simply remove the past season's flower stems.

Eblouissant. (New). A beautiful garnet-red Baby Rambler; very free flowering and excellent bedding variety. 80c each; \$9.00 per doz.; \$70.00 per 100.

Write for our cultural directions on Roses, it will be sent free of charge.

Ellen Poulsen. A most floriferous dark, brilliant pink, very sweetly scented. 60c each; \$7.00 per doz.; \$50.00 per 100.

Lafayette. An entirely new break in the Baby Rambler type, with brilliant cherry-crimson flowers as large as Paul's Scarlet Climber; produced in immense branched trusses, free and continuous blooming. 60c each; \$7.00 per doz.; \$50.00 per 100.

Orleans. One of the best; flowers of comparatively large size of brilliant geranium-red, becoming suffused with rose as the flowers mature, and large, white center; a very pretty color combination. 60c each; \$7.00 per doz.; \$50.00 per 100.

Princess Juliana. (New). A daintier, sweeter combination of maidenblush and peach and ivory, is inconceivable. The florets are prettily waved, and strung along the branched sprays in joyous abandon. The plant growth and habit is apparently equal to any in the class, while the flower beauty is absolutely irresistible. 80c each; \$9.00 per doz.; \$70.00 per 100

George Arends. This is the pink Frau Karl Druschki and the finest of all the pink Hybrid Perpetual Rosen.

Mrs. John Laing.

EIGHT BEST HARDY GARDEN HYBRID PERPETUAL ROSES

The varieties listed below are unquestionably the best that can be selected in the Hybrid Perpetual class, which, before the development of the Hybrid Teas, was the most popular type for garden planting, and even now they dare not be overiooked, but should be used extensively in conjunction with the other sorts, and especially so in iocalities where the hardiness of the Hybrid Tea varieties has not been established. The collection here offered embraces as complete a range of colors as it is possible to bring together in such a number of plants, with freedom of flowering, perfect form, fragrance, hardiness and general excellence.

In pruning Hybrid Perpetuals, cut away all weak growth, and if quality of bloom is desired, cut back the strong canes to within 8 or 9 inches of the ground, but if quantity of bloom for garden effect is desired, leave these canes from 2 to 3 feet high, according to their strength.

The following varieties all 2-year-old. 25 plants of one kind supplied at 100 rate.

Each	Doz.	100
Capt. Mayward. Red with deep center; the flowers are large, globular and borne on long stems	\$9.00	\$70.00
Eugene Furst. Beautiful, velvety crimson, with distinct shading of maroon. One of the richest, showiest and freest biooming of the reds	9.00	70.00
Frau Karl Druschki. This is the ideal hardy white Rose; pure in color, perfect in form, strong grower and remarkabiy free flowering; superb in every way80	9.00	70.00
George Arends or Pink Frau Karl Druschki. This is a pink, or rather a tender rose colored form of the popular white Frau Karl Druschki, possessing not only the exquisite form, large size, and remarkable free-flowering habits of its parent, but in addition to this, it is also highly perfumed; a Rose worthy of a place in every garden80	9.00	70.00
Mrs. John Laing. Soft pink, of beautiful form; exceedingly fragrant and remarkably free flowering; always does well and stands very close to the top among fine Roses	9.00	70.00
Paul Neyron. Dark rose of enormous size; perhaps the largest of all	9.00	70.00
Prince Camille de Rohan. Deep velvety crimson-maroon, shaded scarlet; a magnificent dark Rose	9.00	70.00
General Jacqueminot. Brilliant scarlet- crimson; an old favorite and one of the best known Roses in cultivation; does		
well everywhere	9.00	70.00

TWO NEW ROSES

MARY WALLACE

Named by the Portland Rose Society in honor of the daughter of Secretary of Agriculture Wallace, originated at the Maryland Station of the Department of Agriculture by the late lamented Dr. W. Van Fleet, one of the world's greatest Rosarians, and is the first of a series of what has been called "dooryard" Rosse, that are expected to be of great usefulness and adaptability and to the production of which Dr. W. Van Fleet was giving his best endeavors at the time of his death. The Department describes it as a pillar Rose, making a fine, strong, self-supporting plant 6 to 8 feet high, with large, glossy foliage, blooming with great freedom in Spring and bearing a considerable number of fine buds in Summer and Fall. Flowers very large, generally exceeding 4 inches across; well formed, semi-double, of a bright, clear rosepink with salmon base to the petals. 80c each; \$9.00 per doz.

ROSA HUGONIS

This species, recently introduced from China, is unlike any other Rose. It is of shrublike habit of growth and naturally forms symmetrical bushes about 6 feet high, and the same in diameter, and while not suited to plant in the Rose border, it is an invaluable subject when planted in connection with other shrubs or as single specimens in the garden.

Its delicate yellow single flowers are produced on long, arching sprays early in May, every branch of the previous season's growth becomes lined on both sides to the very tips with these attractive flowers, and after it has finished flowering it remains an attractive decorative bush for the balance of the season; perfectly hardy. Strong, 2-year-old plants, 75c each.

Hardy Climbing and Rambler Roses

Climbing Roses require no pruning in the Spring beyond the cutting out of very old or dead wood, and the shortening of the laterals and long canes to make the growth conform to the space to be covered; but a severe pruning in July, directly after they have finished flowering, is beneficial. Cutting away at that time all old flowering wood will encourage a vigorous growth, which will give an abundance of flowers the following season.

We offer on this page a selection of twelve of the best modern Hardy Climbing and Rambler Roses.

American Fillar. A single-flowering variety of great beauty. The flowers are of large size, 3 to 4 inches across, of a lovely shade of pink, with a clear white eye and cluster of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten. 60c each; \$7.00 per doz.; \$50.00 per 100.

Olimbing American Beauty. Its name is somewhat misleading, but it is one of the best climbing Roses. A strong, healthy, vigorous grower, frequently making shoots from 10 to 12 feet leng, and good sized flowers for a climbing Rose that blooms so freely. Color a pleasing rose-pink; of splendid form; good substance. 60c each; \$7.00 per doz.; \$50.00 per 100.

Dorothy Perkins. Soft shell-pink; flowering profusely in large clusters. Very fragrant and lasting. A grand Rose in every way. 60c each; \$7.00 per doz.; \$50.00 per 100.

Dr. Van Fleet. A Rose, which on account of its dainty color and exquisitely shaped buds and flowers, appeals to everyone. The long, pointed buds are of a rich flesh-pink on stems 12 to 18 inches long. Splendid for cutting. 75c each; \$9.00 per doz.; \$60.00 per 100.

Excelsa. (H. W.). This sort is also known as "Red Dorothy Perkins," and carries the glossy, varnished appearance of foliage shown by that sort, assuring a constant shade all Summer wherever used. The flowers of scarlet-crimson are borne in large trusses, are very double and large, and are produced with the greatest profusion. It is the most valuable sort of its type. 60c each; \$7.00 per doz.; \$50.00 per 100.

white Dorothy Perkins. (H. W.). A pure white climber, identical with Dorothy Perkins except the color. Without doubt the best white climber. 60c each; \$7.00 per doz.; \$50.00 per 100.

Flower of Fairfield. (Cl. P.). Also called the "Everblooming Crimson Rambler." Combines the beauty of the well known Crimson Rambler with a continuous blooming habit, the new growth bearing large clus'ers of crimson blooms through the Summer continuously. Be sure to include this sort in your selection. 60c each; \$7.00 per doz.; \$50.00 per 100.

Miawatha. Small flowers; deep ruby-crimson, accentuated by a white eye, uniquely borne in long trails of 40 to 50 blooms. 60c each; \$7.00 per doz.; \$50.00 per 100.

Paul's Scarlet Climber. No other Rose, in any class, can compare with it for brilliancy of color, which is a vivid scarlet. Flowers are semi-double, very freely produced in clusters of from 3 to 20 flowers each on much branched canes. It is of strong climbing habit and perfectly hardy. One of the most popular climbing Roses. 60c each; \$7.00 per doz.; \$50.00 per 100.

■coserie. Of same habit of growth and flowering as Tausendschoen, but of a deeper and more even shade of cerise-pink or carmine; a strong, vigorous grower and free bloomer. 60c each; \$7.00 per doz.; \$50.00 per 100.

silver Moon. Different from all other Roses, with beautiful semi-double flowers, 4½ inches and over in diameter; pure white in color; petals of great substance, beautifully cupped, forming a Clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness. 60c each; \$7.00 per doz.; \$50.00 per 100.

Star of Persia. A brilliant new Rose with flowers on the order of the lovely old Harrison's Yellow; semi-double, bright yellow, and about 3 inches across. It makes a striking low climber or pillar Rose from 8 to 10 feet high, bursting into showers of sparkling bloom in June. It does not fade and the flower trusses last several weeks. \$1.50 each.

Climbing American Beauty.

Dr. W. Van Fleet.

Bulbs for Hardy Border and Rock Garden

OCK GARDENING, during the past few years, has become very popular. Being the greatest producers of rock plants in this country, we have naturally been getting a great many requests from our customers to supply them with certain varieties of bulbs that might be suitably used in rock gardens. Unfortunately, the exclusion of Narcissi from this country has taken away from us one of our most valuable varieties of bulbs for this particular form of gardening! All tiny Daffodils, such as Narcissus Bulbocodium, commonly known as the Hoop-Petticoat Daffodil; Narcissus Triandrus Albus, known as "Angel's Tears;" Narcissus Cyclamineus, or the Cyclamen Daffodil; Narcissus Moschatus, etc., and many others are being used in Europe in all rock gardens. However, we are still able to obtain the Wild Crocus, and Wild Tulip species, and other small bulbs such as the Muscari, Scillas, Snowdrops, Fritillarias, etc. On page 73, for instance, you will find two very good collections of Wild Crocuses listed. One collection consists of varieties that bloom in the Fall during the months of September and October, while the other collection consists of early Spring-flowering varieties, blooming wherever possible in February or March.

Do not confuse these Wild Crocuses with the well known Dutch varieties. These we do not like to plant in rock gardens, but suggest their use for edging or planting in the lawn only.

Crocus Imperati, Zonatus, Speciosus, Tommasinianus, etc., are great favorites with everyone familiar with rock gardening. Crocus Speciosus, Sativus and Zonatus, for instance, if planted between low-growing varieties of Sedum or Thyme, create a striking effect in October when flowers in rock gardens as a rule are rather scarce. It should be borne in mind, however, that in order to have success with these Wild Crocuses, especially Autumn-flowering varieties, they should be planted immediately upon arrival.

Tulip species, such as Tulipa Persica, Sylvestris, Clusiana, are a delight to watch when they put in their appearance early in April.

Erythroniums or Dog-tooth Violets, in varieties, are natives of this country, and we have made provisions to produce them on our own nursery so that we may be able to take care of the growing demand for these bulbs. There are, of course, innumerable varieties of semi-bulbous plants, such as Trilliums, Corydalis, Mertensias, etc., these can all be found in our hardy plant section.

The Hardy Border is Not Complete Without Bulbs

Bulbs for the hardy border consist of a greater number of varieties than those that are suitable only for the rock garden. We do not believe the hardy plant border is complete without a liberal planting of Darwin, Cottage and Breeder Tulips, Narcissi and other bulbs. The most practical way to go about planting these bulbs in the border is to plant them under dwarf, shallow-rooting herbaceous plants. For instance, all varieties of Thynne and dwarf Sedums are excellently planted right over Tulips. There are also several varieties of Veronicas such as Veronica Rupestris, Amethystina, Royal Blue, True Blue, and several more, which will live in perfect harmony with bulbs. The Tulip or Daffodil bulbs which are planted underneath these dwarf herbaceous plants will last for a great many years.

Ground Covers Require Special Care in Selection

We have also often been asked to suggest ground covers for planting between Tulips, in beds, and in regular bulb gardens. We have noticed in several bulb catalogs information in regard to material of that sort which is rather misleading and impractical because of climatic conditions. Planting ground covers between bulbs is greatly in vogue in England, because it is not necessary to cover bulb beds in England with any straw or manure to protect them through the Winter. There are, of course, localities in the United States where this is not necessary, but in any state where the temperature drops to ten degrees above zero, it is essential that bulbs be protected in order to get the best results. Therefore, the planting of ground covers such as Arabis and Forget-me-nots, which are the two most popular plants used, is always more or less dangerous, because neither of these two plants like a very heavy covering during the Winter.

Viola Cornuta, especially, makes a very fine ground cover, but if the Fall growth of these plants is damaged by a heavy covering, you will not get any blossoms at the time your Tulips are in bloom, therefore entirely defeating the purpose they were intended for. There are, of course, several more varieties of plants which can be used for ground covers or which may be planted in conjunction with bulbs. To anyone interested in carrying out an idea of this sort, we suggest they write us, so that we may recommend suitable material for this purpose in their respective locations.

The Use of Lilies in the Rock Garden

Lilies, particularly, have been grown successfully in hardy plant borders, but we recommend three varieties that may be used in rock gardens, and these are Lilium Tenuifolium, Rubellum and Krameri. All three are dainty, and are best planted in rock gardens where they can be given a sheltered location. All other varieties are splendid material for the hardy plant border.

Bulbs of the Highest Quality for 1927

Imported to Order Only

Darwin Tulips

The Darwin Tulips were developed in the north of France, supposedly from choice varieties of Bybloem Tulips. Owing to the unusual clearness of the colors, to the substance of the petals, and to their vigorous growth, these seedlings, when they came into the hands of the prominent Dutch firms, seemed worthy of forming a new class of Tulips. In 1889 they were named in honor of Darwin, and offered for sale. They remained little known for a number of years but with the renewed interest in the Tulip, which sprang up in England at the beginning of the present decade, they commenced to receive attention. In America the Darwins are now widely appreciated, and their popularity here promises to exceed the favor they have enjoyed so long in Europe.

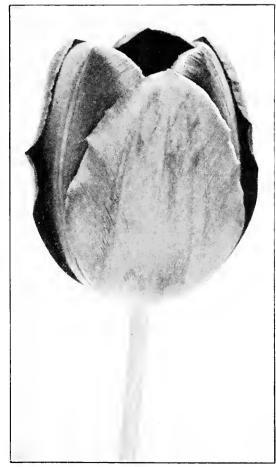

The colors include the brilliant scarlets and crimsons, and the more somber tones of red. The shades of rose and pink, of violet, and purple are unsurpassed for their delicacy or their richness of color. There are slate blues and blue-violets which might almost be called blue, while Dumas' "Black Tulip" is very nearly realized in some of the dark maroon varieties. There are no yellows. All the bronze and buff tones are Breeders; while bright yellow and orange-scarlet must be sought among the Cottage Tulips. The Darwins may be left undisturbed for two years, but it must be kept in mind that Tulips are not long-lived in our soil and climate, but if taken care of we have known them to last ten years. The collection offered in this catalog is made up from the best varieties offered for sale in Holland. All have been tested at Wayside Gardens and we stand behind each one of them.

Darwin Tulips Planted with Lily-of-the-Valley.

Famous Old Dutch Breeder Tulips

The Breeder Tulips have been favorites in Holland for centuries, but it is only within recent years that they have become known and appreciated in America, and now they bid fair to rival the Darwin Tulips in popularity.

Their majestic size and remarkable colors place them distinctly in a class by themselves. Every lover of the more somber shades cannot fail to revel in the rich and artistic blendings of purple and old gold, bronze and terra cotta, brown and violet, and buff and maroon found among the Breeders. They are late to bloom but surpass in size and vigor the Darwins, although lacking the color brilliancy of the latter. The flowers are, many of them, sweet scented, and all splendid for cutting, as they retain for a long time their form and color.

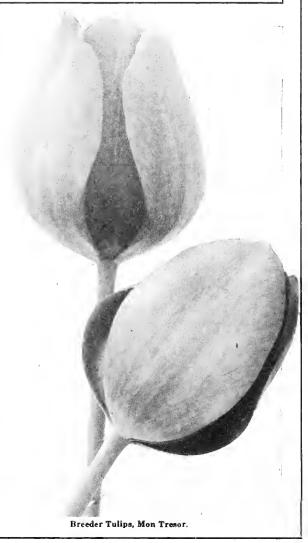

and all splendid for cutting, as they retain for	or a	long tim

Choice Mixed Breeder Tulips

Mixed bulbs, as a rule, do not appeal to the planter of bulbs because it does not make possible the blending of colors. Breeder Tulips, however, are in a class by themselves and their colors do permit easy blending. They are in shades of bronze, golden bronze, violet, buff, maroon and terra cotta. We suggest a liberal planting for cut flowers.

\$3.25 per 100; \$27.00 per 1000.

Cottage or May-Flowering Tulips

The Cottage Tulips come into bloom in early May, after the Early Single varieties have passed. They are hardy and robust, with long, slender, but very stiff stems. The flowers are mostly long and oval, many of them with the petals gracefully reflexed. The Cottage Tulips as a class are rich in the more delicate and artistic shades of yellow, orange, and fawn with salmon, old rose and amber. They are the best of all Tulips for cutting and they develop best when planted outdoors, including the earlier kinds.

Cottage Tulips, Mrs. Moon.

Rembrandt Tulips

When the coloring matter of a "self color" has become split up into stripes and blotches, that particular flower is called "broken" or "rectified." When the Darwin Tulips "break" into these variations, they are called "Rembrandt" Tulips. They are very decorative but should be planted by themselves or in combination with the "Bizarres" and "Bybloemen" which are the broken forms of the Breeder Tulips. All require the same cultural treatment as the other May-flowering Tulips, blooming during the month of May in our latitude, and about a month earlier in far southern sections. In our list we offer what we consider the finest varieties.

Bulbs Bulbs

Finest Mixed Rembrandt Tulips\$5.00 \$44.00

Double Early Tulips

The double varieties cannot be forced so early or readily as the singles. One of the earliest, Salvator Rosa, may be had by the middle of January, while varieties preceded by a (*) may be flowered from January to March. The flowers are large and brilliant and are effective in beds or groups. If grown in pots, do not attempt flowering before they are well rooted.

ing before they are well rooted.

Double Early Tulips, Murillo.

Parrot Tulips

We urge you to grow some of these quaintly shaped flowers particularly for house decoration. The artistic forms and colorings make them especially suitable for cut flower purposes; in the garden, if planted in borders or groups, they are not always satisfactory, as they lack the vigorous, straight stems of the other Tulips with the exception of one variety, the beautiful novelty "Fantasy" which has as straight and tall a stem as a Darwin Tulip. All Parrot Tulips are extremely effective planted in long drifts in front of evergreens.

Single Early Tulips

Including the Best of the Recent Introductions

They are the best fitted of all Tulips for forcing, and, if not grown too cool, some very early varieties may be had in flower by the end of December. When used for bedding, it is far better that new hulbs be secured each year, for the old bulbs will not do well the second season unless they have been allowed to mature and the foliage to die down before being removed from the beds. Even with the best care, it is uncertain whether the bulbs will again bloom successfully during a second season.

In the following list the handsomest sorts alone are represented, while many of the better known varieties are omitted because they are surpassed by the newer kinds. Detailed planting directions are included with the invoice,

Single Early Tulips.

colors. This mixture is made up of hun-	
dreds of named sorts and in equal propor-	
tion of each variety 3.00	26.00

Botanical Tulips and Wild Species

1

Wonderfully Suited for the Rock Garden

The general characteristics of the various species, all of which are natives of Asia Minor and Central Asia, are bright colors and recurved petals. These Tulips do not always feel happy in their new surroundings and after two, or possibly three, seasons, they will disappear. With care and the provision of suitable quarters they will flower quite satisfactorily. They feel best contented in rock gardens and borders.

100	1000
Bulbs	$_{ m Bulbs}$
Clusiana. Outer petals bright cherry-red,	
inner petals creamy white, with violet base,	
small flower, but very distinct and beauti-	
ful. It should be planted in light soil 6	
or 9 inches deep, in the rock garden or	
among stones in the front of the herba-	
ceous border. A warm and sheltered situa-	
tion should be chosen, where it will prove	
to be a gem among early-flowering Tulips.

bulbs or more

Named Single Hyacinths

We strongly recommend the use of Named Bedding Hyacinths for outdoor planting in preference to unnamed Hyacinths under color. The latter are made up of many varieties in mixture, which are not uniform in height, color, or time of blooming. When named bedding Hyacinths are planted, uniformity in color, height of plant, and time of blooming are insured and at a cost not much in excess of unnamed bedding Hyacinths. First size or exhibition size bulbs are too costly for bedding and flowers are too heavy, falling over from their own weight.

ROSE AND RED SHADES

La Victoire. Shining carmine; fine, upright spike. Queen of the Pinks. Bright, glistening pink; tall, erect.

WHITE SHADES

L'Innocence. Pure white; large bells; fine spike. Queen of the Whites. Pure white; early.

Bulbs Measure 12-14 Centimeters.

Bulbs Measure 12-14 Centimeters.

These are the 3-year-old bulbs of the Dutch Hyacinths, easily forced and largely grown for Winter flowering. Can be forced in pots, pans, or grown in bowls and vases in Holland Fiber. They bloom later than the true French Roman Hyacinths but produce larger spikes. Five to six bulbs can be potted in a 6-inch pot. Treatment same as for Dutch Hyacinths. Miniature Hyacinths are splendid for forcing. They are distinguished from the ordinary Dutch Hyacinths by a looser flower spike and small, neat bells. The colors are delightful and when planted in low pots or pans, one color to a pan, the effect is light and graceful, and no more charming decoration could be found. Grand Maître. Lavender-blue.

Grand Maitre. Lavender-blue.
La Victoire. Carmine-rose.
L'Innocence. Pure white
PRICE, ABOVE VARIETIES: \$6.00 per 100.

French Roman Hyacinths.

Single Hyacinths.

French Roman Hyacinths

French Roman Hyacinths are among the earliest bulbs to be had in flower. The bulbs arrive from France late in August, and, like all bulbs grown in the south of France, they may be had in flower from November all through the Winter months, if potted up in September and at intervals of every two weeks. They are much prized for pots or cutting on account of their graceful appearance and delicate fragrance. The bulbs are about the same size as the Miniature Dutch Hyacinths offered on this page, and may be planted six or seven to a 5- or 6-inch pot, or ten to twelve bulbs to an 8- or 9-inch bulb pan. The flowers are smaller than those of the Dutch Hyacinths, and are borne in great profusion, the larger bulbs frequently having three to five graceful spikes of bloom. The white variety is the most reflable. They are not hardy in our northern climate, and should not be planted outdoors.

Miscellaneous Bulbs and Roots for Autumn Planting for Permanent Effects in Borders

For planting in accord with the natural surroundings of your gardens, expressive of perfect harmony and good taste; along the woodland path, in wild flower sanctuaries, along brooks or ponds, or wherever naturalistic planting is wanted. For planting of banks or ground cover amongst Daffodils, Hyacinths or Tulips; in the border in drifts or as edging for flower beds.

Anemone

(Half Hardy-Must Have Protection) Bulbs Bulbs St. Brigid. t. Brigid. Finest Irish strain, showing a great many lovely shadings\$5.50 \$50.00

Brodiaeas

These plants have a small bulb, producing grassy leaves near the ground, and very slender, but stiff, naked stems bearing a head of waxy flowers of great lasting quality. All are pretty. Their culture is the same as for Narcissi, and just as easy as for that flower. They are easily naturalized in almost any soil. Plant them about 3 inches deep, and leave them alone. They are especially happy under oak and decauous trees, in crevices in rocks, or in rough gritty soils. rough, gritty soils.

Bulbs Bulbs 30.00 flowers axa. Is known as Blue Milla, and has a many-flowered umbel of fine blue flowers. It is one of the best for naturalizing Laxa. 35.00

Calochortus

(MARIPOSA OR BUTTERFLY TULIPS)

(MARIPOSA OR BUTTERFLY TULIPS)

Until one has seen a good collection of these plants, he has no idea how much Nature can do in the variation of one flower. All Mariposas are forms of Calochortus, yet there are several strains, all with the slender grace of stem belonging to the species.

Cup-shaped flowers, one to many on a stem, wonderfully marked with eyes and dots and pencilings in rich colors, are characteristics. Yet each strain carries out the plan on a color scheme of its own, and then can be compared only with the orchids in wonderful variability of beauty. "Mariposa" is simply the Spanish word for butterfly, and is applied to these Tulips because the eyes and markings of the flowers are so much like those on a butterfly's wings. The bulbs are small and should be planted about 2½ inches deep and covered during Winter. \$4.00 per 100; \$37.50 per 1000.

Wild Crocuses

Species for Rock Garden or Border

Besides the Dutch Crocuses there are certain species that blossom very much earlier in the year, often before the snow has gone. The flowers of these wild sorts are smaller than those of the Dutch kinds, but they are as vigorous and free as the others. Given a sunny position in the rock garden, or a sheltered position in grass where the sun may encourage them freely, they will surprise you by their hardy appearance in the face of cold and storms. storms.

Crocuses

DUTCH VARIETIES

Crocuses will grow in many positions—in the grass, in the flower borders, among shrubs, in the rock garden, in sun or shade, even under Beech trees. Perhaps the ideal position for them is one where they receive the sun but for part of the day. A position reaching out from beneath tall trees where the grass need not be mown until the pretty striped foliage is quite matured. In such a situation they will not be blanched by the too hot rays of the sun nor caught by the late frosts. They should be splashed upon the landscape with a broad brush—great irregular patches of the various Dutch varieties, one kind at a time, but cach planting blending with the next.

Chionodoxa

(Hardy) 1000 Bulbs Bulbs

Luciliae (Glory of the Snow). A mass planting forms one of the most sumptous displays of floral beauty, a mass of blue and white, intense and brilliant. They bloom at the time of the Crocuses, producing dwarf flower spikes, bearing from 12 to 15 flowers of a sky-blue with a pure white heart, creating a lovely effect. They should be planted in the Fall, three inches deep, about eighteen bulbs to a square foot, in a sunny location or in half shade and in places where they can remain undisturbed for a number of years. The flowers will cross with one another and will seed themselves, forming natural colonies. ... \$2.25

Sazdensis. This is the earlier of the two varieties to come into bloom, and the first real blue flower of another year. This is a rich, blue self-color. The remarks made for the variety Luciliae apply to Sardensis. ... 2.25

Eranthis

Eranthis

(Hardy-Give Slight Protection)

Hyemalis (Winter Aconite). These produce at about the same time that the Crocuses are in bloom, little yellow flowers like Buttercups about three inches above the ground, with settings of fine green, frilled-like collars which never seem to mind the worst of weather conditions. They will thrive under trees where few other plants can hold their own. They seed themselves freely and colonies from self-sown seed are soon formed. Plant firmly two inches deep, in shade or half shade, about 18 bulbs to a square foot. \$2.25 per 100; \$20.00 per 1000. per 1000.

Eremurus (Hardy) (FOXTAIL LILY; GIANT ASPHODELS)

These astonishing plants are just beginning to find their way into American gardens. They come from India. Persia, and Central Africa, and are among the noblest of bulbous plants. A well grown clump of Eremuri may justly be regarded as an achievement to be proud of. The great flower stalk, eight feet tall and more, rises from a crowded tuft of long, narrow leaves, and is crowned by a flower spike two to three feet long, composed of closely set, bell-shaped flowers, in colors of rose, yellow, white and coppery pink.

When flowering is over, the foliage disappears entirely, but reappears very early in the Spring, when it is advisable to protect the young flower spike from lat's frost. To fill the great bare space left when the pint goes to rest, Asters may be planted near it.

In Winter a mulch of straw over the crown is a safeguard. These plants enjoy a rich soil, and a well drained, sunny situation. Plant about 5 to 6 inches deep.

Robustus.

> Erythronium (DOG'S-TOOTH VIOLET) (Hardy)

These are charming woodland plants, producing in early April, small, lily-like flowers of which the colors run in delicate tints of white, pink, cream, bright yellow and rose. They thrive in shaded corners or crevices of rock work. Their beauty is enhanced by their richly mottled leaves. They like a light, rather moist, but well drained soil. Plant the corms about three inches deep.

The following varieties are the best and are all hardy.

Bulbs Bulbs

Californicum. Cream colored, often with 4 or 5 flowers on the stem. Leaves richly mottled. A large colony is a beautiful sight.

Citzinum. A native of Southwestern Oregon; is realten steuten in babit them the large.

The above mentioned varieties are the best and are all hardy.

Fritillaria (Mission Bells)

EUROPEAN VARIETIES 1000

Imperialis (Crown Imperial). One of the most characteristic plants of old-fashioned gardens. It is the most robust of all the species. The flowers are borne in umbels on stout stems 3 to 4 feet high.

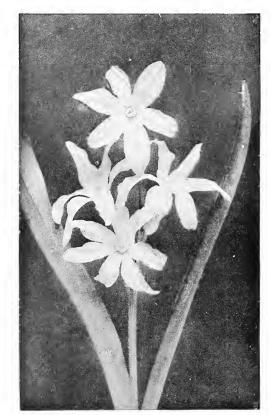

.\$13.00 \$120.00 40.00

NATIVE VARIETIES (Hardy)

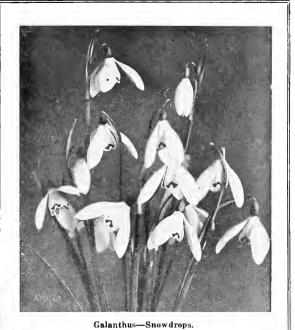

Fritillarias are bulbous plants of the woodlands. The stems are leafy and most graceful, with many pendent, bell-like flowers. One species found in Southern California is called "Mission Bells," while in other places local species are called Brown or Chocolate Lilles.

In the West there are two types; The true Mission Bells do better in a clay soil in full sun. The woodland Fritillarias like woodland soils and conditions, and in cultivation some shade and a free soil. They have proved hardy as far north as Wisconsin. This is hardly a matter for surprise, as F. lanceolata is a southern form of F. camtschatcensis which is found in Alaska and crosses into Siberia.

Bulbs Bulbs ..\$7.00 \$65.00 85.00 65.00

Chionodoxa Luciliae-Glory-of-the-Snow.

Galanthus (Snowdrops)

(Hardy)

100 1000 Bulbs Bulbs

These are particularly effective under hedges, under cedar trees and in thin woodland. They are the first to open in the Spring and are very lovely. They dislike being moved and should be left alone to naturalize themselves. Plant two inches deep; mulch in Winter with straw, hay, leaves or well-decayed manure. The single-flowering Snowdrops, if they are left alone, soon take to producing double flowers. The differences and variations in the varieties of Snowdrops are so comparatively small that it does not seem worth while to offer them in variety \$2.50 \$23.00

Spanish Iris (Iris Hispanica)

These beautiful bulbous Iris have appropriately been called the "Orchids of the Hardy Flower Garden." For best effects they should be planted in beds or groups of twenty-five or more, the larger the number the finer the effect. They grow from 18 to 24 inches high, and bloom from the end of May on through June.

(Hardy)

100 1000 Bulbs Bulbs

Vernum (Spring Snowflake). This is one of the earliest and most attractive Spring flowers. Growing from 6 to 8 inches high they bear dainty nodding flowers which are white, tipped with green. They should be planted in early Fall in a good, light, well drained soil in which they may be buried 4 or 5 inches apart in masses or bold clumps, to be effective, 2 inches deep, and then be left alone to bloom year after year.....\$5.00 \$47.50

Muscari (Grape Hyacinths)

(Hardy)

100 1000 Bulbs Bulbs

20.00

Botryoides coeruleum. Bright blue; very free grower which naturalizes easily, flowering at the time of the Crocuses......\$1.50 \$12.00

Reavenly Blue. While there are several kinds of Muscari, we consider this variety the best for mass planting. Their flowers open just about the time that the Chionodoxas and Crocuses are going off. They do very well in the wild garden and also in the grass if it is not too rank. They are nice under trees and along the borders where they may be left undisturbed. They will seed themselves and make pretty effects when once established.

Scillas (Squills)

(Hardy)

These flourish in sun as well as in shade under trees. They are not particular about the soil in which they grow. They are ideal for the wild garden but they are not to be despised in the border, especially if they are left alone for two or three years without being disturbed in any way. They are splendid in the rock garden. Produce drooping, bell-like flowers.

Planting Table for Plants and Bulbs

PLANTING. The table below shows the number of plants or bulbs required to fill a circular bed of the dimensions given. In planting begin at outside row—where 6 inches apart, 3 inches from edge of bed; where 12 inches apart, 6 inches from edge of bed. It is customary among professionals in planting a bed to set the plants or bulbs somewhat closer together in the two outer rows, giving more space between each plant or bulb toward the center of the bed.

Diameter of bed	6 in. apart	12 in. apart	18 in. apart	Diameter of bed	6 in. apart	12 in. apart	18 in. apart
3 feet	28	7		12 feet	452	113	50
4 feet	48	12	6	13 feet	528	132	59
5 feet	80	20	8	14 feet	612	153	68
6 feet	112	28	13	15 feet	704	176	78
7 feet	152	38	17	16 feet	804	201	89
8 feet	200	50	23	17 feet	904	226	100
9 feet	256	64	28	18 feet	1016	254	113
10 feet	32 0	80	36	19 feet	1132	283	126
11 feet	380	95	42	20 feet	1256	314	139

A square bed will take about the same number of plants. For an oval bed, add length and breadth and divide by two. For example, an oval 9 feet long by 7 feet wide will require the same number of plants as a circular bed 8 feet in diameter.

Lilium Candidum

(MADONNA LILY)

Choice Northern Grown. Arrive in August or September.

Maeterlinck refers to this loveliest of Lilies when he

"The great white Lily, the old lord of the gardens, the only authentic prince among all the commonalty issuing from the kitchen-garden, the ditches, the copses, the pools and the moors, among the strangers come from none knows where, with his invariable six-petaled chalice of silver, whose nobility dates back to that of the gods themselves, the immemorial Lily raises his ancient sceptre, august, inviolate, which creates around it a zone of chastity, silence and light."

Be very careful that you plant the right type of this beautiful Lily in your garden. There is an early-flowering variety which is grown in the south of France. These should not be used in America; if planted in the garden, they are prone to disease and are unsatisfactory. In Europe this type is called L. candidum speciosum. This variety is only too often sold because they cost less.

The true type of use for the garden is the L. candidum from the north of France. This bulb is easily recognized by its white, fleshy scales, by those that know both types.

This Lily of all Lilies should be planted in quantity in every garden—emblem of purity, the inspiration of poet and painter for centuries, and a benediction in the garden when June is melting into July—their delicious fragrance is not equalled by any other Lily.

Plant in loam or sandy soil, surrounding the bulb with sharp sand and placing it somewhat on its side. An open, fully exposed place is best for it. After it has become fully extablished leave it alone as it much resents disturbance at the roots. If necessary to transplant, do so as soon as the flower stems die down. great white Lily, the old lord of the gardens, the

Calla Lilies

(Tender-Indoor Only)

These like a stiff, clayey soil with a small quantity of shredded cow manure. Bulbs should be set with the crown, or top, protruding just above the surface. When in growing condition, warm water given several times during the week will hasten the flowering period and increase the number of blooms. When using the large sized bulbs, plant but one in a pot; smaller ones, two. We call especial attention to the Yellow Calla, which is one of the grandest varieties in cultivation, and most valuable for house or conservatory decoration. See the description below. Plant Callas indoors only in the Fall or Spring of the year.

Lilium Regale or Myriophyllum

For other Lilies, see pages 32, 33 and 34.

Growing anywhere under almost any condition, establishing itself without any trouble or effort on your part, it is in our mind the easiest and one of the most beautiful, and hardiest Lilies in cultivation. Lilium Regale is truly a royal Lily, worthy of a place in every garden. A vigorous grower with sturdy stems; 4 to 5 feet high, densely covered with long, lanceolate foliage. Center of flower flushed with yellow, shading to white at the outer edges; externally the flowers are streaked with brown, shaded through the almost translucent petals with a delightful pearly tint; the contrast between the rich color of the reverse of the petals and the gold shading of the throat is extraordinarily beautiful. Thrives in any good rich soil and is the easiest of all Lilies to grow. Stemroots; plant Fall or early Spring, about 5 inches deep. July flowering. In order to bring this unusually handsome Lily into the hands of every flower lover and gardener, we offer it in 5 sizes, the smallest of which will produce 3 to 4 good flowers, not as many on one stem as is shown in the illustration, which is a spike produced by an 8-to 9-inch bulb. (Our stock is the largest in cultivation in America).

What to Plant and Where?

Is a question which is asked more often than any other. We have, therefore, prepared a few selections giving the best and most useful plants suitable for various locations. We have not made this list any longer than would be practical. We have selected only Rock and Wall Plants which we are sure will succeed in this country. In the case of border plants, we have prepared two selections, one that will do well in shade; the other for wet places. The balance of plants offered in our catalog such as Delphiniums, Gaillardias, Coreopsis, Chrysanthemums, Phlox, etc., growing under normal care in every garden have not been mentioned in this list. We believe that with this information before you, you will be able to build and enjoy a better and more attractive garden. If further information is required, write us and we shall be glad to help you.

GROUND COVERS

Ajuga Genevensis Ajuga Reptans Rubra

Asperula Odorata

Lysimachla Nummularia

Mitchella Repens

Phlox Subulata Alba Phlox Subulata Lilacina Phlox Subulata Rosea Ground cover for shady place; also does well in moist places.

For shade. (Waldmeister also used in flavoring wine).
For wet places in full sun or indry place in shade.

For shady places; requires acid soil; evergreen.

Excellent ground covers for hot and dry, sandy places; do well on poor soil.

Pachysandra Terminalls

Prunella Grandiflora Sedum Acre Sedum Sarmentesum Thymus. All varleties

Veronica Rupestris. All varieties

Vinca Minor Euonymus Radicans Acuta

English Ivv

Ground cover and edging plant; does best in light shade; evergreen. Good ground cover in full sun.

Good ground cover for sunny, dry places.

Good ground cover for sunny places.

Good ground cover for either sunny or shady places; evergreen, Good ground cover for shady places; evergreen.

Hardwood Ashes

Unleached hardwood ashes are the best source from which may be derived the most needed fertilizer—POTASH. Ninety-five per cent of the gardens in the United States today need Potash badly. Phosphates and nitrates, as a rule have been abundantly applied by most gardeners, but potash, owing to its scarcity has not been used where it ought to have been. We have contracted with a very large hardwood lumber company to

supply us with all the hardwood ashes needed on our own nursery, and we have put up a few hundred barrels so that we may be able to help our customers in securing this most valuable material. Apply it either in the Fall or Spring at the rate of one pound to ten square feet. Hardwood ashes cannot be sold in bags, and are therefore offered in barrels weighing 200 lbs. each. We charge \$6.00 for a 200-lb. barrel.

Imported Dutch Peat

Imported Granulated Dutch Peat is used with excellent results in the making of garden soils, especially those soils that are very heavy, or very dry. Peat stimulates the development of roots of all plants and in the Summer it is an excellent moisture retainer, as it absorbs more than eight times its own weight in water. For mulching perennial beds it is ideal. A slight covering of two inches thrown over the bed will prevent all freezing and heaving. As a mulch for strawberries, it cannot be improved. When the Winter is over, peat may be dug in and should not be removed. It acts, therefore, in a double capacity. If one wishes to plant such shrubs as Rhododendrons, Kalmias, Azaleas, Blueberries or Arbutus, (all these shrubs and plants like an acid soil) we can safely guarantee that soil prepared with 50 per cent Peat and 50 per cent top soil will grow any of these plants mentioned to perfection.

Do not be mistaken, Peat is not a fertilizer,

although often sold as such. It is a decomposed plant material which loosens the soil and prepares it so that the most delicate plants and trees may be grown to perfection. We do not advise its use for the making of lawns as we do not believe that it does very much good there, but it may be applied with good success in the making of a vegetable garden, solely as a material to prepare the soil, eliminating the necessity of bringing in large quantities of top soil.

It is also an excellent ground cover under evergreens, Rhododendrons and Azaleas, keeping the soil moist and cool during the hot Summer, giving an exceptionally tidy appearance under these shrubs, as they should never be cultivated.

Peat may be stored in a garage or woodshed for any length of time, as there is nothing that will or can spoil it. We offer bags of 20 to 25 lbs. for \$2.00 each. One such bag will cover about 12 square feet 2 inches deep.

GROUND COVERS

In Quantity

We have a large quantity always on hand for the use of landscape architects of the most popular ground covers, such as:

Pachysandra Terminalis, 1-year-old, 2-year-old, and pot plants.

Vinca Minor (Choice Nursery Grown Stock) 1-year-old, 2-year-old, and pot plants.

Thyme, in six varieties. Veronica in several creeping varieties.

Euonymus in varieties. English and Irish Ivies. etc.

We are always glad to quote special prices for large quantities.

TERMS OF BUSINESS

Quality of Stock Offered

All of the stock offered is grown on our own grounds, that grown from cuttings and divisions we know to be clean and true. Plants grown from seeds, are from seed stocks obtained from the most reliable sources, here and abroad.

Our plants are all field-grown, are given constant care and cultivation and when sent out are strong and well developed, much larger and worth a great

deal more money than pot-grown plants.

We do not divide our plants before shipping but send the entire plant as dug. Dividing is only done in rare cases and only then because it is necessary to get the best results. If, after receiving, you are not satisfied with the quality of the stock, let us know and we will replace anything you mention without charge or without question.

Guarantees

We guarantee all stock furnished by us to be first-class, true to name, all of a size so as to give immediate results. However, there are so many causes for failure over which we have no control, that we can assume no responsibility after stock is delivered. Poor soil, unfavorable weather, ignorant or careless culture—all contribute to failure and are beyond our control.

Terms of Payment

Customers unknown to us will please send cash or references with their order. It is impossible for us to make immediate shipment to new clients who do not send references or check with their order. Not sending references or enclosing check causes delay in the forwarding of the stock you order.

Complaints

We are compelled to do all our work during two very short periods in the Fall and Spring. In order to get stock shipped on time, it is necessary that we work late in the night. An error is occasionally made during these rush periods. We, therefore, suggest that you check over plants immediately upon receipt. If any plants or bulbs have been damaged while in transit or if shortages occur, notify us promptly, and corrections will be made immediately, or new stock sent without charge for that which is damaged. No complaints entertained ten days after date of shipment.

Quantities Ordered

We do not sell less than three plants of a kind unless offered otherwise. Three to six plants are charged at three rate; seven to twenty-four, at twelve rate; twenty-five and over, at hundred rate.

Recommendations

We are sincerely grateful to the numerous customers who kindly recommend our house, and on being favored with the name and address of any friend possessing a garden, we shall always be pleased to forward our catalog.

Shipping Directions

Please give explicit shipping directions, stating whether stock is to be shipped by parcel post or express. Small shipments can be sent by parcel post. All such shipments will be sent insured, insurance and postage to be paid by the customer. In the event you send remittance with your order, parcel post charges may be sent to us after you have received the package.
